1	Martel. I represent Dr. Kearl. 09:04:21	1	MR. NORTON: Then 578. 09:06:52
2	MR. TENKIN: Andrew Tenkin, Oracle	2	(Deposition Exhibit 578 marked
3	America.	3	for identification.)
4	MR. PURCELL: Dan Purcell, Keker & Van	4	BY MR. NORTON:
5	Nest. I represent Google. 09:04:29	5	Q And the way I organized these may be a 09:07:44
6	MR. ADAMS: Gregory Adams, with CRA	6	little differently from how you had them, but
7	International.	7	Exhibit 576 should be your report. Exhibit 577
8	THE VIDEOGRAPHER: Our court reporter,	8	should be the tables to your the appendices to
9	Kelli Combs of Veritext, will swear in the witness.	9	your report. And 578 should be the tables; is that
10	(Deponent sworn.) 09:04:41	10	correct? 09:08:02
11	THE VIDEOGRAPHER: You may proceed.	11	A That's correct.
12	MR. COOPER: Counsel, at the outset, as I	12	Q Okay.
13	indicated prior to the beginning of the deposition,	13	Now, other than the change that you
14	Dr. Kearl has a correction he would like to make to	14	described to Paragraph 86 of your report, do you
15	Paragraph 86 of 09:05:00	15	have any other changes to the report that you want 09:08:15
16	He'd like to make a correction to	16	to make?
17	Paragraph 86 of his report.	17	A No.
18	MR. NORTON: Please, go ahead.	18	Q Can you just describe for me your
19	THE WITNESS: In Paragraph 86, in order to	19	background in calculating patent damages?
20	get the total value of the deal, I added the value 09:05:17	20	A I've been retained in a number of cases 09:08:27
21	of Sun to the value to Google. That's the	21	either to do reasonable royalty or lost profits
22	denominator. And then divide that into the value of	22	and have filed reports on those matters.
23	the Sun to get an estimate of the portfolio royalty.	23	Q And how many cases have you calculated a
24	I should have netted out, of the part that	24	reasonable royalty for patents?
25	goes into the denominator, the transfer between 09:05:33	25	A Probably seven or eight. You need to 09:08:53
	6		8
1	Google and Oracle for the \$20 million payments, 09:05:35	1	clarify what you mean "cases." Would this be 09:08:56
2	upfront payments, and the \$25 million capped	2	formal testimony? It would be less than that, but
3	royalty. The present value of those two numbers is	3	I've worked on matters in which there has been
4	a little less than \$100 million. So the denominator	4	preliminary work done, often settled, in
5	would be slightly smaller and, therefore, the 09:05:51	5	probably I don't know maybe ten, eight to 09:09:08
6	estimated royalty slightly larger.	6	ten.
7	EXAMINATION	7	Q Then of that eight to ten, how many cases
8	BY MR. NORTON:	8	did you give testimony concerning a reasonable
9	Q All right. Thank you.	9	royalty in a patent case?
10	We'll probably come back to that a little 09:06:08	10	A I think only two. 09:09:20
11	bit later in the morning.	11	Q And those two, did you testify on behalf
12	Why don't we start with the easiest	12	of the plaintiff or the defendant or one of each?
13	question of the day. Would you rather I call you	13	A Both cases was on behalf of the
14	Professor or Dr. Kearl?	14	defendant.
15	A Whatever works for you. 09:06:19	15	Q And have you 09:09:34
16	Q I probably will switch back and forth	16	Prior to this case, have you ever been
17	because I won't remember.	17	engaged to calculate a reasonable royalty copyright
18	Why don't we start by marking your report,	18	case?
19	and I'll ask the court reporter, first, to mark	19	A Well, yes. Damages in a very large
20	Exhibit 570 I'm sorry 576. 09:06:28	20	copyright case, in a couple of cases, yes. 09:09:46
21	(Deposition Exhibit 576 marked	21	Q And did you give testimony concerning the
22	for identification.)	22	value of a license in a copyright case?
23	MR. NORTON: Then 577.	23	A I was deposed in at least one of those
24	(Deposition Exhibit 577 marked	24	cases. It's since disappeared into practice, as
25	for identification.) 09:06:52	25	the lawyers say. I don't recall. I don't think I 09:10:06
	7		9

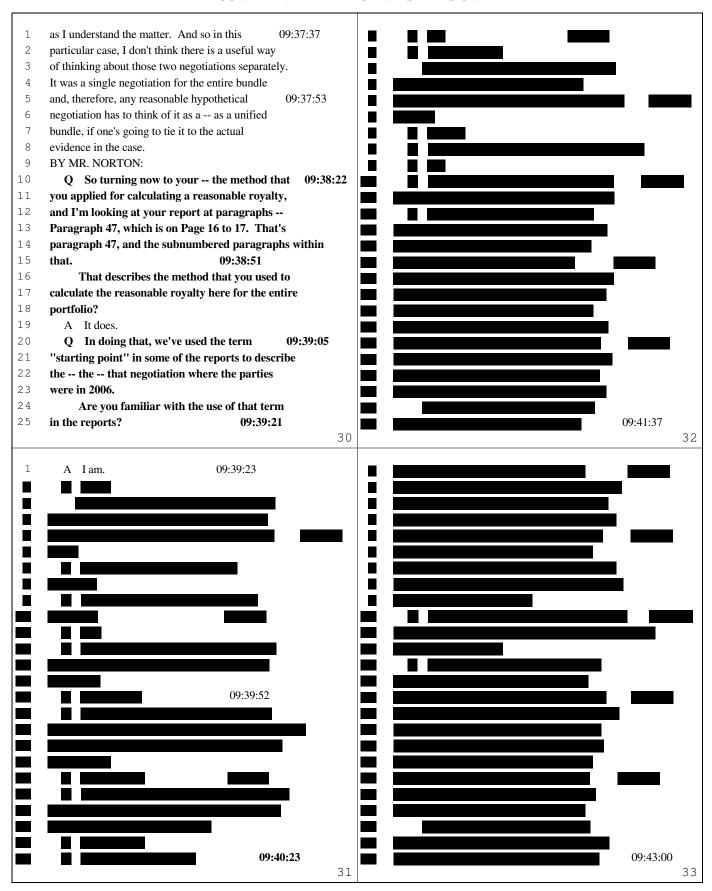

1	gave testimony in the other case. 09:10:10	1	for the copyrights in suit? 09:12:54
2	Q And in the copyright case in which you	2	A Correct.
3	gave testimony, did you testify on behalf of the	3	Q And to calculate infringer's profits for
4	plaintiff or on behalf of the defendant?	4	copyrights in suit?
5	A The defendant. 09:10:18	5	A Correct. 09:12:59
6	Q What was the nature of the product in the	6	Q And lost profits for those copyrights?
7	copyright case in which you gave testimony on a	7	A Correct.
8	reasonable royalty?	8	Q And for each of those measures of damage,
9	A Software.	9	have you reached an independent opinion as to what
10	Q And the two patent cases in which you gave 09:10:30	10	the damages are in this case? 09:13:07
11	testimony on behalf of the defendants concerning a	11	A Within the confines of Judge Alsup's
12			
	reasonable royalty, what was the nature of the	12	orders, yes.
13	products in those cases?	13	Q In order to reach your opinions, did you
14	A They were both medical devices.	14	limit yourself to the documents
15	Q In the copyright case that involved 09:10:47	15	With respect to documents, did you limit 09:13:27
16	software, what kind of software was that?	16	yourself to the documents that were cited by the
17	A UNIX software.	17	parties' experts in their reports?
18	Q Do you recall the name of that case?	18	A Mostly, but as you'll note in the
19	A Yes, it's IBM versus SCO or SCO versus	19	footnotes, there are some documents that we went
20	IBM. 09:11:02	20	out and got that we judged to be relevant to this 09:13:43
21	Q If you could just describe for me what you	21	case.
22	understand your task in this particular case to be?	22	Q When you mention documents that you went
23	A I was retained by the Court, as I	23	out and got, are you referring to literature and
24	understand the matter, to originally critique the	24	things in the public record?
25	experts of each side. And then when the trial was 09:11:20	25	A Yes. 09:13:58
	10		12
1	delayed, Judge Alsup asked if I could come up with 09:11:24	1	Q So to the extent you rely on documents 09:13:59
2	an independent damages estimate. My response was	2	produced by the parties, did you limit yourself to
3	I could within the confines of the record. That	3	documents that were cited in one of the expert's
4	is, I couldn't go out and do independent research	4	reports?
5	beyond literature research. So I think it's fair 09:11:41	5	A Yes. 09:14:09
6	to say that it's morphed over time from at least	6	Q Did you review deposition testimony of
7	what it appeared to be last fall, as the trial has	7	witnesses in this case?
8	been delayed.	8	A I have.
9	Q But is it fair to say that, ultimately,	9	Q Did you limit yourself to deposition
10	your task included the job of coming up with an 09:11:55	10	testimony that was cited by one of the experts in 09:14:19
	0 0 1	11	the case?
11	independent opinion as to the reasonable royalty of the patents-in-suit in this case?		A No.
12	-	12	
13	A Right, but within some fairly tight	13	Q So you reviewed deposition testimony that
14	constraints. It's my understanding that Judge	14	had not necessarily been cited by any expert?
15	Alsup ruled that I would not be allowed to opine 09:12:09	15	A That's correct. 09:14:30
16	on matters that he had precluded experts on either	16	Q And did you have access to all of the
17	side from testifying about, so it's not a sort of	17	deposition transcripts in the case?
18	go anywhere effort. It's within the confines of	18	MR. COOPER: Objection; calls for
19	his orders over the last three months.	19	speculation.
20	Q But with that understanding, it would be 09:12:39	20	THE WITNESS: Yeah, I think so, but I'm 09:14:43
21	fair to say that your task included the job of	21	not sure because we don't have a listing of all of
Z 1	calculating a reasonable royalty for the	22	the depositions that were taken.
22		1	DV MD MODTON
	patents-in-suit in this case?	23	BY MR. NORTON:
22	patents-in-suit in this case? A Yes.	23	Q Are you aware of any depositions for which

1	did not receive a transcript? 09:14:56	1	Now, did you understand in the course of 09:17:31
2	A No.	2	your task, that you were permitted to come up with
3	Q Now, have you conducted any interviews	3	any methodology you chose to best calculate a
4	with any employees of any party?	4	reasonable royalty for the patents-in-suit?
5	A Let me clarify. I assume that retained 09:15:17	5	A I interpreted Judge Alsup's instruction 09:17:48
6	experts are not defined as employees of the	6	to me that I was to derive an independent estimate
7	parties.	7	as allowing for that, yes, subject, as I said now
8	Q I meant to carve those out. Let me ask it	8	a couple of times, to his subsequent orders
9	a little bit differently.	9	limiting the other experts on the case.
10	You have spoken with each of the parties' 09:15:26	10	Q And so with respect to the reasonable 09:18:09
11	retained damages experts, correct?	11	royalty methodology reasonable royalty
12	A I have.	12	methodology in this case, have you reached an
L3	Q Some of the parties' retained technical	13	opinion as to what the best way is to calculate a
L 4	experts?	14	reasonable royalty for the patents and copyrights in
L 5	A I have. 09:15:33	15	suit? 09:18:22
16	Q Other than the parties' retained technical	16	A I have.
7	experts and retained damages experts, have you	17	Q Okay.
. 8	spoken to any employee of any party?	18	And
. 9	A No.	19	A Let me back up. I've come up with a
0 2	Q To the extent that either Professor 09:15:44	20	methodology for estimate for the best way to 09:18:30
1	Cockburn or Dr. Leonard or Dr. Cox relies on	21	estimate the reasonable royalty on the portfolio
22	interviews with employees of a party, have you	22	that the parties were discussing in 2006. The
23	considered those interviews?	23	allocation of that portfolio royalty to the
2 4	A To the degree that they're reflected in	24	patents and copyrights in suit is constrained by
25	the reports, and then there were subsequent 09:16:06	25	Judge Alsup's orders. 09:18:50
	14		10
1	depositions of the people that they may have 09:16:09	1	Q Let me break that down a little bit. 09:18:54
2	interviewed, yes.	2	So with respect to calculating a royalty
3	Q To the extent that the expert	3	on the portfolio that the parties were discussing in
4	To the extent that Dr. Cox relied on	4	2006, you have come up with what you believe is the
5	interviews of people, or a person who was not 09:16:19	5	best way to calculate that royalty; is that correct? 09:19:06
6	subsequently interviewed, at some point deposed, did	6	A Correct.
7	you rely on those interviews?	7	Q Sorry. I didn't mean to speak over you.
8	A Again, only to the degree that he	8	And I know it's in the report, but in
9	reflects those interviews in his own reports.	9	brief form, what is the best way to calculate that
L 0	Q Is there anything that you did to assess 09:16:38	10	royalty? 09:19:20
1	the accuracy of the statements that were relayed to	11	A Has really three parts: One is to begin
L 2	Dr. Cox by the people he interviewed?	12	with the assumption that the parties would have
13	A No.	13	negotiated either a percentage of revenue or a per
L 4	Q In the course of reaching your opinions,	14	handset royalty in 2006; that that would then be
L 5	did you make any assumptions? 09:16:58	15	applied to actual Google revenues going forward; 09:19:46
L 6	A Yes.	16	and then to focus on the estimation of that per
L 7	Q Is it possible for you to tell me what	17	unit or percentage royalty by looking at the
L 8	your primary assumptions are?	18	expectations of both parties in 2006 and how they
	A I think a fair answer to that is that	19	valued the 2006 deal, backing out from the deal
	they are reflected in the report. We've been 09:17:13	20	the things that were not associated with the 09:20:14
L 9		21	intellectual property.
L 9 2 0			
19 20 21	tried to be very clear about when I've made an		O That allows you to calculate a ner handset
9 20 21 22	tried to be very clear about when I've made an assumption. And without walking through the	22	Q That allows you to calculate a per handset or per revenue dollar royalty rate?
L9 20 21 22 23	tried to be very clear about when I've made an assumption. And without walking through the report, I'm not sure I can give a fair answer to	22	or per revenue dollar royalty rate?
19 20 21 22	tried to be very clear about when I've made an assumption. And without walking through the	22	

1 1			
1	Well, with respect to apportioning that 09:20:33	1	BY MR. NORTON:
2	2006 royalty rate, have you come up with what you	2	Q So an approach that looks at the change in
3	believe is the best methodology for apportioning to	3	market share of Android as a result of the
4	the intellectual property in suit?	4	infringement?
5	A I don't think that's what I testified 09:20:56	5	A Yes. 09:23:52
6	to. What I said was after after the	6	Q And uses that to apportion?
7	determining the reasonable royalty on the	7	A Yes.
8	portfolio, then the apportionment is really	8	Q Did you reach an opinion as to whether
9	constrained by Judge Alsup's orders. And I	9	that approach was, as a matter of economics, was
10	adopted the group and value methodology of 09:21:10	10	better or worse than the group and value approach? 09:24:03
11	Professor Cockburn, but I'm not opining on whether	11	A Both approaches have some problems, and
12	that's the best methodology for doing this.	12	I think both approaches have some strengths, so
13	Q When you say, "whether that's the best	13	there is not it's not an easy call, which is
14	methodology for doing this," what is "this"?	14	which one dominates the other.
15	A Apportioning. 09:21:27	15	Q Did you conduct an analysis, an 09:24:21
16	Q Did you consider other ways of	16	apportionment analysis, using the changes in market
17	apportioning?	17	share?
18	A Over the course of the last six months,	18	A Yes.
19	yes, a number of different ways.	19	Q Is that analysis in your report?
20	Q Did you identify any means of apportioning 09:21:39	20	A No. 09:24:35
21	that is better than Professor Cockburn's group and	21	Q Is it excluded from your report because of
22	value approach, as permitted by Judge Alsup's	22	your understanding of Judge Alsup's orders?
2,3	orders?	23	A That's correct.
2.4	A No.	24	Q When you conducted an analysis using the
25	Q When I ask you "better," I mean, better in 09:21:57	25	changes in market shares, did you get to the point 09:24:46
	18		20
1	your estimation as an economist. 09:21:59	1	where you actually calculated a per unit royalty? 09:24:48
2	A No.	2	A We may have.
3	Q Are there other methods that you	3	Q Did you get to the point where you
4	considered to be reasonable methods of apportioning,	4	calculated a royalty as a percentage of Google
	although perhaps not as good as the group and value 09:22:25		
5		1 5	advertising revenues? 09:25:07
5 6		5	advertising revenues? 09:25:07 A Yes.
6	approach permitted by Judge Alsup?	6	A Yes.
6 7	approach permitted by Judge Alsup? MR. COOPER: Objection as to form.	6 7	A Yes. Q Under that analysis using the change in
6	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying	6 7 8	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate
6 7 8 9	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question	6 7 8 9	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues?
6 7 8 9	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON:	6 7 8 9	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23
6 7 8 9	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course.	6 7 8 9 10 11	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the
6 7 8 9 10 11	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys.	6 7 8 9 10 11 12	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and
6 7 8 9 10 11 12 13	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that	6 7 8 9 10 11 12 13	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach?
6 7 8 9 10 11 12 13	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that	6 7 8 9 10 11 12 13 14	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot.
6 7 8 9 10 11 12 13 14	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? 09:23:15	6 7 8 9 10 11 12 13 14	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36"
6 7 8 9 10 11 12 13 14 15	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? 09:23:15 MR. PURCELL: I think so.	6 7 8 9 10 11 12 13 14 15	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"?
6 7 8 9 10 11 12 13 14 15 16	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? 09:23:15 MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell.	6 7 8 9 10 11 12 13 14 15 16	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying
6 7 8 9 10 11 12 13 14 15 16 17	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition.	6 7 8 9 10 11 12 13 14 15 16 17	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go
6 7 8 9 10 11 12 13 14 15 16 17 18	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? O9:23:15 MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I	6 7 8 9 10 11 12 13 14 15 16 17 18	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? O9:23:15 MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I think you can answer. 09:23:28	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report has, so as long as it's understood that this is 09:26:11
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? O9:23:15 MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I think you can answer. O9:23:28 THE WITNESS: Fair enough. Then I think	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report has, so as long as it's understood that this is 09:26:11 that we didn't complete the work because we were
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? O9:23:15 MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I think you can answer. O9:23:28 THE WITNESS: Fair enough. Then I think the approach that looks at the change in market	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report has, so as long as it's understood that this is 09:26:11 that we didn't complete the work because we were instructed not to complete the work, it probably
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I think you can answer. 09:23:28 THE WITNESS: Fair enough. Then I think the approach that looks at the change in market share, predicted change in market share, was a good	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report has, so as long as it's understood that this is 09:26:11 that we didn't complete the work because we were instructed not to complete the work, it probably would have been I don't know maybe twice as
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? O9:23:15 MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I think you can answer. O9:23:28 THE WITNESS: Fair enough. Then I think the approach that looks at the change in market	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report has, so as long as it's understood that this is 09:26:11 that we didn't complete the work because we were instructed not to complete the work, it probably would have been I don't know maybe twice as high, in the 2 or 3 percent range, as opposed to
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	approach permitted by Judge Alsup? MR. COOPER: Objection as to form. THE WITNESS: Let me ask a clarifying question BY MR. NORTON: Q Of course. A of both attorneys. Am I permitted to talk about things that Judge Alsup has excluded in answer to that question? MR. PURCELL: I think so. MR. NORTON: I agree with Mr. Purcell. MR. PURCELL: This is just a deposition. Your testimony at trial might be limited, but I think you can answer. 09:23:28 THE WITNESS: Fair enough. Then I think the approach that looks at the change in market share, predicted change in market share, was a good	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A Yes. Q Under that analysis using the change in market shares, what royalty rate did you calculate as a percentage of Google advertising revenues? A I don't recall at this point. 09:25:23 Q Was it greater than or less than the royalty rate that you calculated using the group and value approach? A Greater, but not a lot. Q Can you put any order of magnitude on "not 09:25:36 a lot"? A Well, I need to preface this by saying that we did some preliminary work. It did not go through the kind of vetting that the final report has, so as long as it's understood that this is 09:26:11 that we didn't complete the work because we were instructed not to complete the work, it probably would have been I don't know maybe twice as

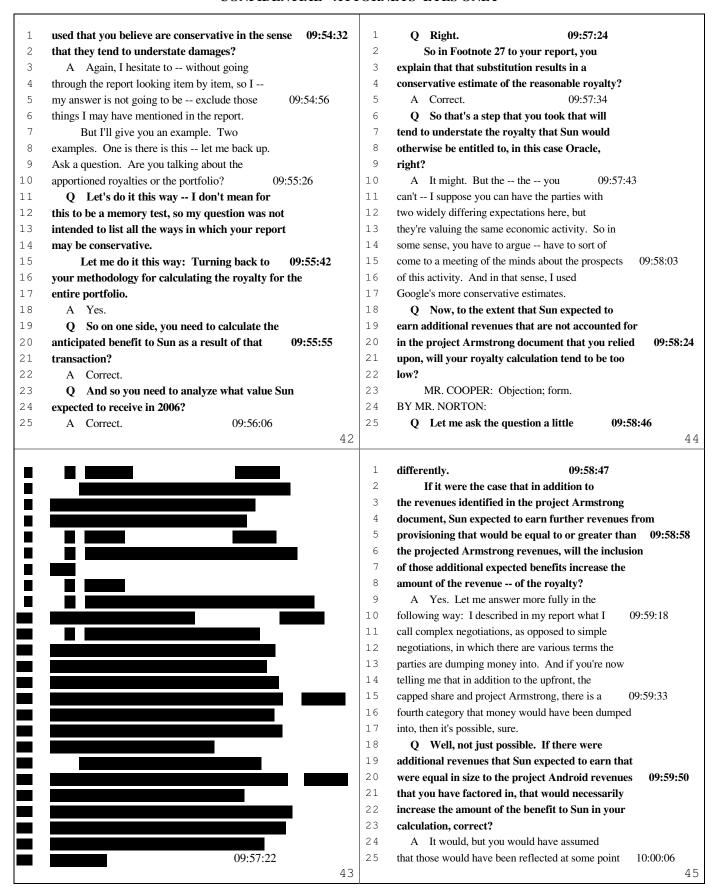

1	much as 50 to 80 percent higher than the fairly 09:26:32	1	their phones. 09:29:39
2	low royalties.	2	For example, you could imagine that the
3	Q Were there any other apportionment	3	way that Google could have offset the market share
4	analyses that you began to use, but stopped because	4	effect would be to provide a subsidy to the phones
5	of orders by Judge Alsup? 09:26:49	5	equal to the sort of the amount that they would 09:29:51
6	A We worked at estimating this the same	6	have lost because of the reduced functionality.
7	way we've sort of tracked the experts here,	7	It's just unclear because if you think of these as
8	which is my job. And so in Professor Cockburn's	8	independent OEMs, and you think kind of a
9	first report or second report, sorry, not his	9	competitive market here in which the handsets
10	first report, but his second report. 09:27:11	10	themselves are priced at roughly equal to the cost 09:30:07
11	Q So you used the method	11	of the equipment and stuff in the handsets, then it
12	You performed an analysis using the method	12	doesn't make a lot of sense to argue the adjudgment
13	that Professor Cockburn used to apportion in his	13	would have been in the price.
14	September 2011 report?	14	Q Okay.
15	A Yeah, we explored that method, parts of 09:27:23	15	So did you reach a conclusion as an 09:30:24
16	that method, sure.	16	economist as to whether an approach using the change
17	Q In exploring that method, did you reach a	17	in market shares would have been economically sound?
18	conclusion as to what you believe the royalty rate	18	A With the caveats I've just given, yes,
19	would be if that were a permissible method?	19	but it would have required a careful analysis
20	A It would have been what I just told you 09:27:38	20	of of what would have happened as the 09:30:46
21	a few minutes ago. It would have been roughly	21	functionality of the phones decreased and what
22	twice the current I need to be very cautious	22	part of that would have been reflected in market
23	here because I don't have the numbers in front of	23	share and what part of it would have been
24	me, and I didn't write the numbers down, but my	24	reflected in perhaps the direct subsidy to Google.
25	vague recollection is they would be roughly twice 09:27:48	25	I mean, Google presumably cares about 09:31:03
	22		24
1	the size of the current royalties, maybe not quite 09:27:49	1	market share, but it also cares about its 09:31:05
2	that large.	2	advertising revenues on these phones. So if you
3	Q Now, with respect to the the change in	3	netted out a subsidy they had to pay, that would
4	market share approach that you considered that you	4	have reduced their their their net revenues,
5	did not include in your final report, did you reach 09:28:14	5	which would have mattered to them as well. 09:31:15
6	an opinion as an economist as to whether that	6	Let me put it a slightly different way.
7	approach would be sound as a matter of economics?	7	Even if you don't have the same market share
8	A It requires some additional work that I	8	even if the market share doesn't change by the full
9	think Professor Cockburn didn't do. The as I	9	amount predicted by Professor Cockburn, it's
10	understand, that approach was excluded by Judge 09:28:41	10	partially offset, but it's offset by subsidies to 09:31:31
11	Alsup on an argument that when the predicted	11	Google. Then Google's revenues from the handsets
12	willingness to pay was compared to the price, the	12	goes down, in part, because of the market share
13	price of the phone was not allowed to move, that	13	and, in part, because it has to offset the problems
14	this was Dr. Leonard's principal criticism. It's	14	that the OEMs have in selling their phones. That
15	my understanding that was at the heart of why 09:29:01	15	was not explored carefully by Professor Cockburn. 09:31:49
16	Judge Alsup excluded that.	16	I did not explore it. So short of exploring that,
17	It's hard to believe these phones' prices	17	you know, there is not much that can be said there,
18	would have gone down. Google didn't control the	18	except that it was an appropriate methodology if
19	price. So it is a reasonable assumption that the	19	that hole could have been filled.
20	price of the Android phones would not have changed, 09:29:18	20	Q All right. Thank you. 09:32:06
21	and this would have been mostly a market share, a	21	Now, with respect to the copyright
22	functionality would have affected market share, but	22	reasonable royalty, is there any difference in your
23	that required some additional stable work by	23	approach to calculating a reasonable royalty for
24	Professor Cockburn, having to do with the Google's	24	copyright and a reasonable royalty for patents?
25	relationships with the OEMs and how the OEMs price 09:29:35	25	A No. And here I need to be very 09:32:24
	23		25

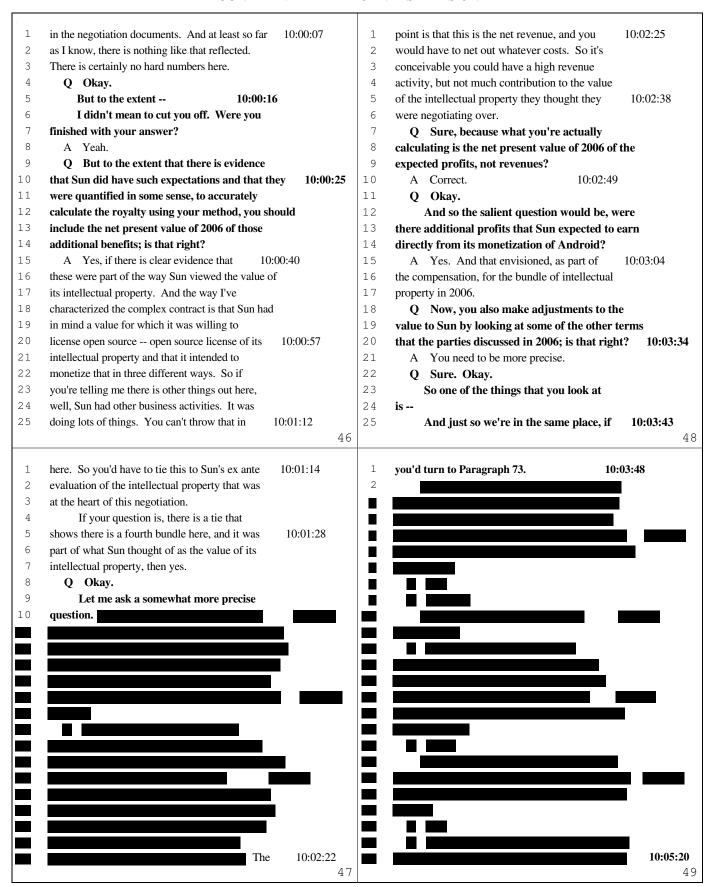

1	cautious. I'm not a lawyer, obviously. It's my 09:32:26	1	factors to calculate a reasonable royalty in a 09:34:58
2	understanding that there is not really a	2	patent case, does that make good economic sense?
3	reasonable royalty on a on copyrights. A	3	A You're asking me to opine on the Georgia
4	different term is used, but all of the experts in	4	Pacific factors?
5	this case have used a reasonable royalty approach 09:32:39	5	Q A good an economically sensible way to 09:35:10
6	to deriving the the what would have been the	6	calculate a royalty in a patent case?
7	foregone revenues on the on the copyrights, and	7	A Well, if you mean a a a
8	I have adopted that approach.	8	negotiation, a hypothetical negotiation, the
9	Q To the extent that	9	answer is in some cases yes, in some cases no.
10	To the extent that damages in a copyright 09:32:56	10	I've opined in my report this makes sense 09:35:24
11	case can be measured by a hypothetical license that	11	for a portfolio, doesn't really make sense for the
12	would have been negotiated between the parties at	12	individual patents. But I think the Georgia
13	the time that infringement began, and to the extent	13	Pacific factors are don't have a lot of weight
14	that in a patent case, damages could be calculated	14	among economists. I don't think this is this is
15	by calculating a hypothetical license that would 09:33:14	15	not the approach that an economist would take to 09:35:47
16	have been negotiated by the parties at the time the	16	thinking about these matters. And you know, sort
17	infringement began, is there any economic reason to	17	of there is a constraint here that economists have
18	approach those two measurements any differently?	18	to pour themselves into. And so if you read these
19	A Yes. The patents have a known life.	19	reports, including the experts in this case, the
20	And it's my understanding that the copyrights have 09:33:31	20	Georgia Pacific factors are a set of, we've got to 09:36:00
21	a known life, but it's much longer. I don't know	21	do this; let's just check off the list. They don't
22	what the life is, but it's a much longer period of	22	seriously inform the analysis.
23	time. So presumably, if you were able to think	23	In defense of my report, I took them
24	about these negotiations as separate on the two	24	seriously because they provided, as you know since
25	different forms of intellectual property, they 09:33:49	25	you have read it, a place to critique the experts, 09:36:21
	26		28
1	might take a slightly different character because 09:33:52	1	which was part of my assignment. And so they 09:36:25
2	of the because of the lifetime, expected life	2	allowed me an opportunity to address specifically a
3	of that.	3	number of topics the experts brought on. In this
4	And, you know, you have invited me to	4	case they happened to be useful, but in lots of
5	speculate a little bit here, so I will. It's 09:34:04	5	cases they are not terribly useful. 09:36:38
6	conceivable that the kind of noninfringing	6	Q So is the approach that you used to
7	substitutes could be different for patents than for	7	calculate a reasonable royalty for patents, is it
8	copyrights.	8	just as good a method for calculating the
9	Q Okay.	9	hypothetical license for the copyrights in this
10	You're familiar with the Georgia Pacific 09:34:16	10	case? 09:36:49
11	factors?	11	MR. COOPER: From an economic point of
12	A I am.	12	view?
13	Q All right.	13	MR. NORTON: From an economic point of
14	In the two observations that you just made	14	view, yes.
15	that might be different between copyrights and 09:34:22	15	THE WITNESS: I think I've answered that 09:36:59
16	patents, would those potential differences be	16	question. You know, if you had separate licenses
17	addressed by application of the Georgia Pacific	17	for patents and for copyrights, as opposed to a
18	factors?	18	portfolio of intellectual property, and had
19	A I'm not quite sure how to answer. It's	19	negotiations that would inform you about how the
20	my understanding the Georgia Pacific factors apply 09:34:39	20	parties thought about those two separate things, 09:37:20
~ -	to the reasonable royalty for patents and not for	21	then I think in principle, given my earlier answer,
21			one could think about the negotiations as being
22	copyrights, but I'm happy to be informed if I've	22	
22 23	copyrights, but I'm happy to be informed if I've got that wrong.	23	somewhat different between the two. But in this
22	copyrights, but I'm happy to be informed if I've		

		1	Google and Sun.	09:45:57
		2	A They would have individually had to	heir
		3	expectations about the validity and enforces	ability
4 Q So when you use an irrevoca	ible or	4	of the intellectual property. And presumab	-
5 perpetual license in this case, if the		5	that affects the license in that the party	09:46:12
6 irrevocable as you treat it in your r		6	licensing, Sun in this case, probably doesn't	want
7 would have the rights to the intelled		7	those challenged and would rather get the n	
8 for as long as the intellectual prope		8	And Google doesn't want to spend the time	•
9 that right?	10, 0111000, 10	9	money to challenge. I assume that's why lie	
10 A Yes, I assume it's for the life of	of the 09:43:42	10	are taken. So so they would have they	
product, is what these contracts are all		11	have had differing expectations, for all I kn	•
Q But Google would also be re		12	but they would not have assumed in those	···,
Sun for as long as it was exploiting	= -	13	negotiations that the intellectual property w	as
intellectual property; is that also co		14	not valid or not enforceable.	us
15 A That's correct.	09:43:53	15	Q Are you familiar with the term ''l	itigation 00.46.43
Q If you are correct in your co		16	premium''?	1118411011 021-101-13
the license would be a perpetual on		17	A I am.	
also, at the same time, conclude tha	• •	18	Q What is a litigation premium?	
continue to pay royalties into the fu		19	A It's the litigation creates an	
20 right?	09:44:13	20	uncertain environment takes an uncertain	09:46:53
A Yes, that's correct.	V2+77+1J	21	environment and creates certainty about cer	
22 III		22	aspects of that environment, and that move	
		23	from uncertainty to certainty has a dollar va	
		24	That's the litigation premium.	uuc.
	44:26	25	Q So prior to the litigation being br	ought 09:47:06
	34		Q 50 prior to the nugation being br	36
		1	and resolved, there is some uncertainty?	09:47:09
		2	A There is.	07.47.07
		3	Q And uncertainty about what?	
		4	A Lots of things. That's a pretty broad	1
5 Q To the extent that there is a	legal 09:44:42	5	question. 09:4'	
6 requirement to calculate damages t	_	6	Q That's fair.	
7 trial, does that have any effect on y	•	7	Uncertainty with respect to what the	hat
8 the structure of this license?	our approach to	8	bears on the litigation premium?	iat
9 MR. COOPER: Objection; for	m.	9	A Well, that's also a broad question, a	nd
THE WITNESS: No. My app		10	I address this in the report. There is	09:47:34
estimate the royalty rate. That is the		11	uncertainty about which of the patents migl	
they would have agreed to in 2006, an		12	needed. If you don't believe there is any	. v .
date of trial it's applied to actual Goog		13	uncertainty about that, then the 2006 negoti	ation
revenues. And if asked about going f		14	was over these patents and the value of it is	
court, I would simply say you apply t		15	•	9:47:52
rate either as a running royalty, or if i		16	So you've got sort of which which	,,2
sum, that you have to get reasonable		17	course through this technology Google is ac	rtually
the expectations of the parties going f		18	going to take. And then if it takes the cours	
BY MR. NORTON:	OI MI WI	19	through this technology, which patents end	
	, would the 09:45:32	20	and copyrights end up being infringed, and	
O Now in the 2006 negotiation	, "Julu ilic 07.73.32	21	sort of the issue of the validity and the	07.70.10
,	that the	1 / 1	som of the issue of the validity and the	
parties have necessarily concluded			enforceability of those patents and convirial	its that
parties have necessarily concluded intellectual property in that bundle		22	enforceability of those patents and copyright	
parties have necessarily concluded intellectual property in that bundle and to be infringed by Google?		22 23	happened to have been infringed, all of that	
parties have necessarily concluded intellectual property in that bundle	was both valid	22		is not

1			
	in 2006 reflect a discount because of the 09:48:31	1	litigation premium. 09:51:28
2	uncertainty that existed at that time, in comparison	2	BY MR. NORTON:
3	to the state of knowledge after the litigation?	3	Q I'm sorry.
4	A It may have.	4	When you say, "there is empirical evidence
5	Q And 09:48:44	5	that there is a positive litigation premium," are 09:51:34
6	A And as I've indicated in a number of	6	you talking about this case?
7	points in my report let me back up.	7	A No, not this case. I'm just talking
8	It's unclear what "conservative" means	8	about the economists who studied this matter have
9	into my role, so I'm not when I say	9	found that there is a positive litigation premium.
10	"conservative," I don't know who I'm supposed to be 09:48:58	10	Q And so in general, one expects there to be 09:51:47
11	conservative for, and I've tried not but the	11	a litigation premium?
12	approach in the end I took I took was to say,	12	A Yes, based on that empirical work.
13	this is a lower bound, and there are a number of	13	Q And that empirical work is focused on the
14	reasons why the actual royalty would be above the	14	issue of uncertainty with respect to validity and
15	number I put forward. It's not an upper bound. 09:49:16	15	infringement; is that right? 09:52:01
16	So and I didn't necessarily try to bias it that	16	A I think so. I'd have to go back and
17	way, but it just turns out the way things fall, it	17	look at the study. I just know there is this
18	appears to be a lower bound, and it would be a	18	premium that we're talking about.
19	lower bound on this argument as well.	19	Q I'm sorry.
20	Q So to the extent that there was 09:49:34	20	Now, you have used the term "conservative" 09:52:10
21	uncertainty with respect to validity and	21	in a number of places in your report to describe
22	infringement with respect to the IP in suit in 2006,	22	your methods and conclusions; is that right?
23	one would expect that after the litigation, if the	23	A Yes.
24	parties had a new negotiation, the royalty rate	24	Q When you use the term "conservative" in
25	would be higher than what you have calculated; is 09:49:52	25	your report, by that, you mean that you have 09:52:19
	38		40
1	that true? 09:49:54	1	calculated damages that are lower than what might 09:52:22
2	A Well, maybe. It's not altogether clear		
	-	2	be lower than what would be the case if you had
3	which way this goes. I mean, Sun has uncertainty	3	perfect information?
4	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are	3 4	perfect information? A For the most part, yes.
4 5	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07	3 4 5	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34
4 5 6	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has uncertainty about sort of the cost of figuring 09:50:07	3 4 5 6	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or
4 5 6 7	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear	3 4 5 6 7	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high?
4 5 6 7 8	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly.	3 4 5 6 7 8	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but
4 5 6 7 8 9	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to	3 4 5 6 7 8 9	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in
4 5 6 7 8 9	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32	3 4 5 6 7 8 9	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51
4 5 6 7 8 9 10	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of up:50:32 infringement and validity in this case with respect	3 4 5 6 7 8 9 10	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up.
4 5 6 7 8 9 10 11	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they	3 4 5 6 7 8 9 10 11	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case
4 5 6 7 8 9 10 11 12	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that
4 5 6 7 8 9 10 11 12 13 14	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45	3 4 5 6 7 8 9 10 11 12 13 14 15	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14
4 5 6 7 8 9 10 11 12 13 14 15	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want	3 4 5 6 7 8 9 10 11 12 13 14 15	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated?
4 5 6 7 8 9 10 11 12 13 14 15 16	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is	3 4 5 6 7 8 9 10 11 12 13 14 15 16	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated? A Well, that goes to an issue that really
4 5 6 7 8 9 10 11 12 13 14 15 16 17	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is Google may have been willing to pay a small premium	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated? A Well, that goes to an issue that really starts with Professor Cockburn a long time ago
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is Google may have been willing to pay a small premium in order to for the for the portfolio, in	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be higher than the one you have calculated? A Well, that goes to an issue that really starts with Professor Cockburn a long time ago about whether or not the Sun Armstrong project
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is Google may have been willing to pay a small premium in order to for the for the portfolio, in order to avoid the litigation that could come if it 09:51:07	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated? A Well, that goes to an issue that really starts with Professor Cockburn a long time ago about whether or not the Sun Armstrong project expected revenues are a way of thinking about 09:53:40
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is Google may have been willing to pay a small premium in order to for the for the portfolio, in order to avoid the litigation that could come if it 09:51:07 subsequently infringed.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated? A Well, that goes to an issue that really starts with Professor Cockburn a long time ago about whether or not the Sun Armstrong project expected revenues are a way of thinking about 09:53:40 about that issue. And if they are, the answer is
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is Google may have been willing to pay a small premium in order to for the for the portfolio, in order to avoid the litigation that could come if it 09:51:07 subsequently infringed. So there is the uncertainty here cuts a	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated? A Well, that goes to an issue that really starts with Professor Cockburn a long time ago about whether or not the Sun Armstrong project expected revenues are a way of thinking about about that issue. And if they are, the answer is the royalty that I estimated, for the most part,
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And Google has 09:50:07 uncertainty about sort of the cost of figuring that out and discovering it. So it's unclear which way that goes, frankly. Q But it is possible, if the parties were to renegotiate a license after determination of 09:50:32 infringement and validity in this case with respect to the patents and copyrights in suit, that they would negotiate for a higher royalty rate than the one you have calculated? MR. COOPER: Objection; form. 09:50:45 THE WITNESS: That's possible, but I want to emphasize again the point I just made, which is Google may have been willing to pay a small premium in order to for the for the portfolio, in order to avoid the litigation that could come if it 09:51:07 subsequently infringed. So there is the uncertainty here cuts a couple of different ways. I don't think it cuts	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	perfect information? A For the most part, yes. Q Is there any example where you have used 09:52:34 the term "conservative" to describe a methodology or conclusion you have reached that might be too high? A Not that comes readily to mind, but there may be. I don't recall. I think, in general, the estimates I have, you would expect 09:52:51 the adjustments to go the other go up. Q And so given that, wouldn't it be the case that if the parties were to renegotiate the license after a finding of infringement and validity, that the royalty that they would negotiate would be 09:53:14 higher than the one you have calculated? A Well, that goes to an issue that really starts with Professor Cockburn a long time ago about whether or not the Sun Armstrong project expected revenues are a way of thinking about 09:53:40 about that issue. And if they are, the answer is the royalty that I estimated, for the most part, incorporates that.
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	which way this goes. I mean, Sun has uncertainty about which of its patents and copyrights are valid and enforceable, right? And if they are, the answer is the royalty that I estimated, for the most part, incorporates that.

1	have Google promoting the Java brand in the mobile 10:14:46	1	a discount rate?	10:17:2	1
2	space?	2	A I do.		
3	A Probably.	3	Q And the discount rate	that you used was	
4	Q In connection with Android?	4	15 percent?		
5	A Probably. 10:14:51	5	A Yes.	10:17:25	
6	Q Is there any way in which it would not be	6			
7	to the benefit of Sun to have Google promoting Java				
8	in the mobile space?				
9	MR. COOPER: Objection; form.				
10	BY MR. NORTON:			10:17:33	
11	Q You said "probably," and I'm trying to	11	Q All right.		
12	figure out what makes it something less than	12	What is the reason to us	se a discount rate	
13	certain.	13	in the first place?		
14	A Do you want me to speculate? Is this an	14	A Because the future is un	certain.	
15	invitation to speculate? 10:15:22	15	Q All right.	10:17:41	
16	Q No. Is there a specific reason, that you	16	A And money is costly.		
17	can think of, as to why it would not be valuable to	17			ī
18	Sun to have Google promoting Android as Java?				
19	MR. COOPER: Same objection; form.				
20	THE WITNESS: This is really speculation, 10:16:02				
21	but to the degree that project Armstrong was not				
22	successful and that Sun did not gain or it's	22	Q The fixed fee payment	s come over a	
23	getting most of its monetization of this	23	three-year period?	3 001110 0 701 4	
24	intellectual property so suppose going forward	24	A Correct.		
25	it's not successful, then Sun may very well have 10:16:18	25	Q You characterize those	as low risk: is	10:18:06
	58		2 100 0101 0001 0000		60
1	been interested in an alternative or competitive 10:16:25	1	that right?	10:18:07	
2	product, in which case, it's not of interest to have	2	A Correct.		
3	your competitors saying, "I'm just like the product	3	Q Are they lower risk that	an the future	
4	that just came on the market."	4	revenues?		
5	BY MR. NORTON:	5	A Yes.	10:18:15	
6	Q And all the evidence that you have seen	6	Q Is it appropriate to ap	ply the same	
7	suggests that Sun expected Project Armstrong to be	7	discount rate for the relatively		
8	successful?	8	payments as it is for the futur		
9	A Yes.	9	A I think so. I think you v		
10	Q Okay. 10:16:42	10	project-specific discount rate.		10:18:25
11	So at the time of the 2006 negotiation,	11	for a subproject-specific discou		
12	Sun would have expected that Google's promotion of	12	could do that, but I think typica		
13	Java in the mobile space in connection with Android	13	venture capitalist or whomever		
14	would be valuable to Sun?	14	doesn't split the project into par	-	
15	A I think so, yes. 10:16:52	15	They just use a discount rate. A	-	10:18:42
16	Q And would you agree that Sun would have	16	rate, overall, reflects the relative		
17	expected that Google's promotion of Java in the	17	this, so you could argue to the d		
18	mobile space in connection with Android would be	18	15 percent well, you could ar		
19	very valuable?	19	15 percent, in some sense, aggre		
20	MR. COOPER: Objection; form. 10:17:04	20	and reflects those.	10:18:56	
21	MR. PURCELL: Join.	21	Let me put it slightly diff		
22	THE WITNESS: I don't know.		par to originary diff	· · · · · · · · · · · · · · · · · · ·	
23	BY MR. NORTON:	23	at, let's say, the money market i	rate or something	
	Q So when you have to bring the future	24	like this because they're certain	_	
24	~ ~ · · · · · · · · · · · · · · · · · ·		and decided and the contains	,,	
24 25	revenues back to net present value of 2006, you use 10:17:18	25	you know, one might argue that	the Project	10:19:09

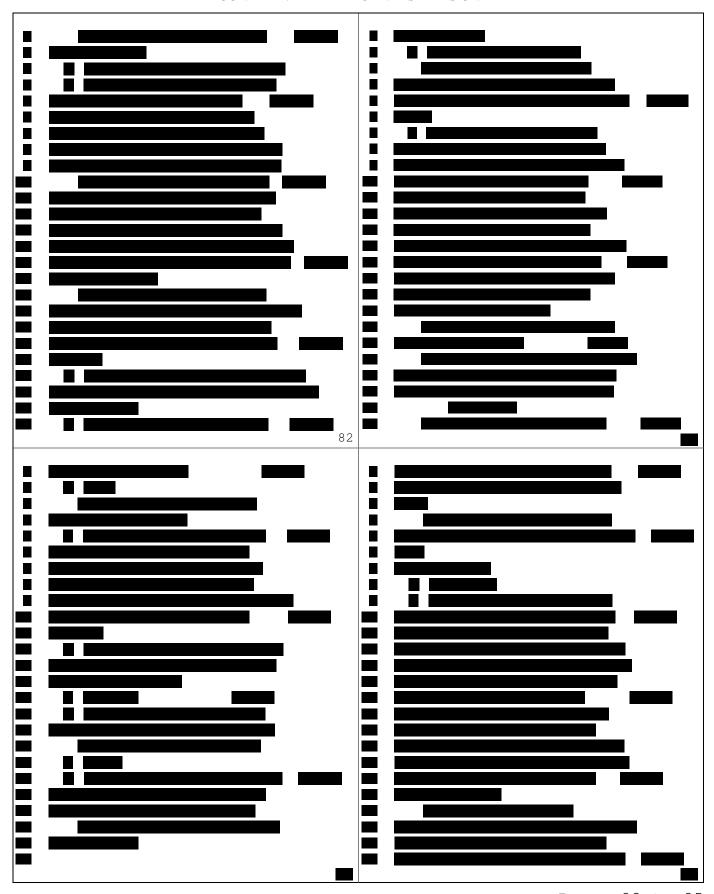

,			
1	Armstrong monies have to be discounted at a 10:19:10	1	Q And your use of 15 percent instead of 10:21:39
2	substantially higher interest rate because they are	2	11.77 percent is conservative, correct?
3	more far more speculative and 15 percent is too	3	A Correct.
4	low.	4	Q And conservative, again, in the sense that
5	Q So in a sense, the 15 percent discount 10:19:21	5	had you used 11.77 percent, the royalty damages 10:21:46
6	rate is a is right for the whole project?	6	would be great?
7	A It is. That's how we've treated it.	7	A Agreed.
8	Q Now, the 15 percent discount rate itself	8	Q To the extent that well, let me strike
9	is another number that you characterize as	9	that.
10	conservative; is that right? 10:19:33	10	So one part of the equation is to figure 10:22:17
11	A Correct.	11	out what Sun's expected benefits are, expected
12	Q And again, it's conservative in the sense	12	profits are, and discount them back to net present
13	that it is a larger discount factor, discount rate,	13	value, correct?
14	than might reasonably apply?	14	A Correct.
15	A Well, this goes to an issue about 10:19:46	15	Q And then the second part of the equation 10:22:27
16	that economists struggle with some on damages.	16	is to determine what Google's expected profits are
17	You can get the rate of return, the cost of	17	and discount those back to net present value?
18	capital, essentially, for firms that look like Sun	18	A Correct.
19	and Google. And I think, actually, Professor	19	Q Now, in calculating Google's anticipated
20	or Dr. Cox does that, and it's 11-point something 10:20:05	20	benefits, what benefits did you consider? 10:22:39
21	percent.	21	(Whereupon, Allyson Franco with
22	And then the question is, is a specific	22	Farella Braun & Martel, just
23	project more or less risky than the average risk of	23	entered the conference room.)
24	the firm's because that's the way the market values	24	THE WITNESS: I make the argument early in
25	the firm as a whole. What you'd like to have, and 10:20:19	25	the report that the parties would have agreed to a 10:22:52
	62		64
1	the theoretically appropriate thing, is to have 10:20:22	1	license on Google's Android revenues on the 10:22:54
2	the the interest rate that reflects the risk of	2	argument, a monitoring argument, that you don't want
3	the project, not the risk of the firm. We don't	3	to have things that are difficult to measure, so we
4	have that, and typically you don't have that. So	4	just look at Google's Android revenues.
5	it's conservative in the sense that it's above the 10:20:37	5	MR. COOPER: Let the record show that 10:23:07
6	average user cost of capital for firms that look	6	Allyson Franco from our firm has joined the
7	like Sun, but it may not be conservative relative	7	deposition.
8	to the risks of specific projects. I just don't	8	MR. NORTON: Thank you.
9	have information on that.	9	BY MR. NORTON:
10	Q All right. 10:20:54	10	Q Does it make any difference in your 10:23:15
11	But in Footnote 28 to your report, you	11	calculation whether Google expected other
12	state that:	12	substantial benefits from watching Android?
13	"I conclude use of the	13	A I'm not certain I know what you have in
14	15 percent discount rate is	14	mind, so you need to be more specific about that.
15	conservative in this instance"? 10:21:02	15	Q Okay. 10:23:55
16	A That's correct, because typically damage	16	In your review of the evidence, have you
17	experts are left to use the average, not the	17	seen any evidence that Google expected Android to
18	project specific. And we know the average for the	18	provide benefits to its Desktop search business?
19	group of firms in that industrial classification	19	A Not really. There are vague allusions
20	is, what, 11 something, 11.8 percent. So in that 10:21:19	20	to this, but I haven't seen, quote, evidence. 10:24:28
21	sense, it's conservative. That's all I meant.	21	Q To the extent that Google expected that
22	Q So in your report, you note that the	22	Android would provide benefits to its Desktop search
23	discount rate for 6 code 737, which includes both	23	business, are those benefits factored into your
24	Sun and Google, was 11.77 percent?	24	royalty analysis?
25	A Yes. 10:21:38	25	A Yes, in a sense they are. One of the 10:24:56
	03		65

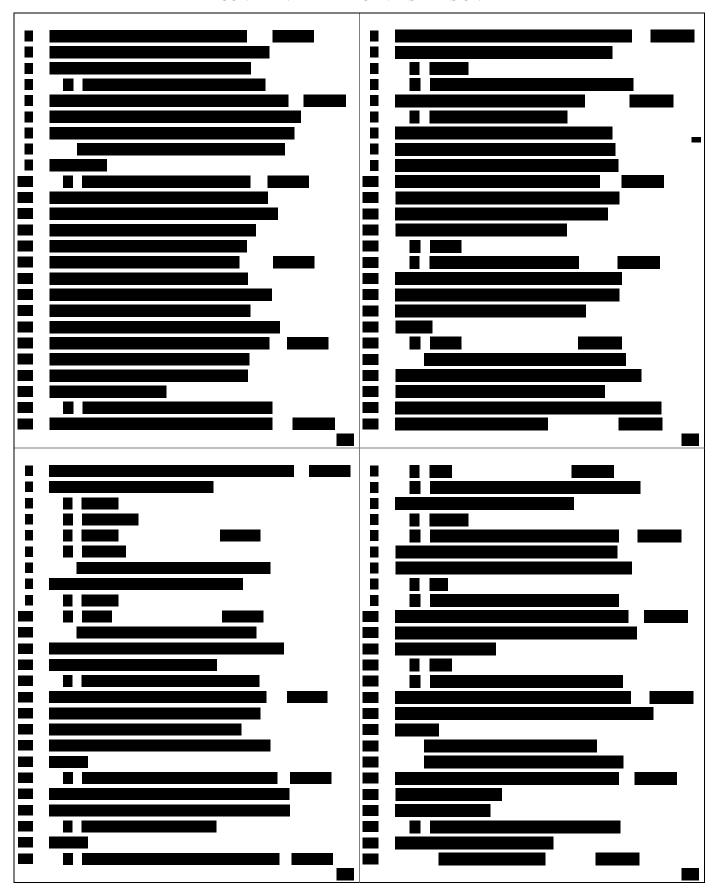

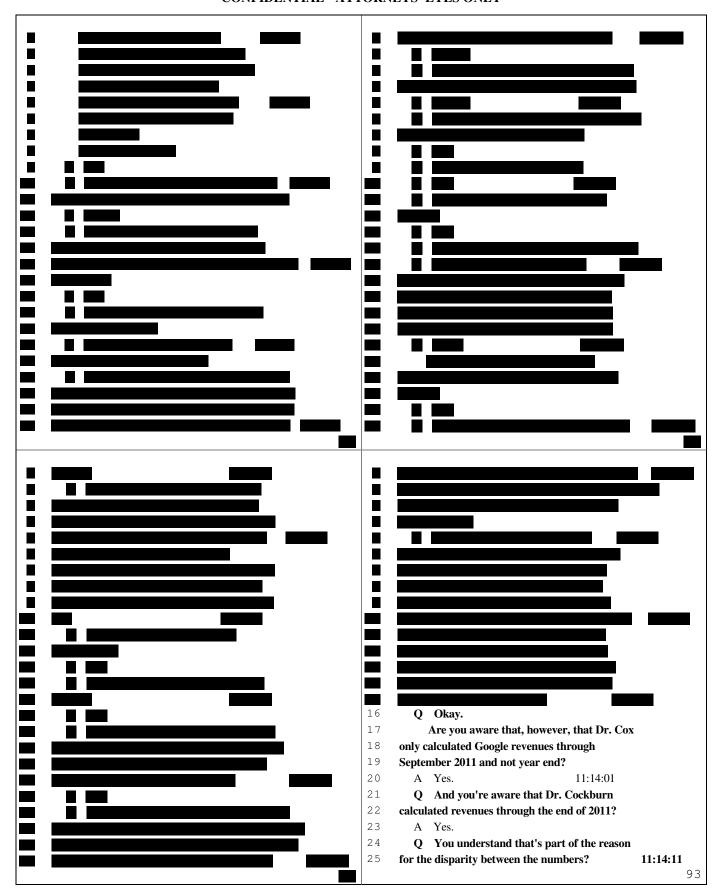

1	compatible implementation. 10:30:33	1	made in 2006. 10:33:35
2	Q So when we look at the hypothetical	2	Q Okay.
3	negotiation, imagine the parties negotiating for the	3	And so to the extent that there were
4	infringement that Google actually did, do you agree	4	alternatives available to Google in 2006, the
5	that Sun would have expected some additional 10:30:49	5	economic effect of those alternatives is already 10:33:45
6	compensation to account for the risk of increased	6	baked into the bargain the parties would have struck
7	fragmentation from an incompatible implementation?	7	at that time?
8	A Yes.	8	A Yes.
9	Q And that additional compensation that Sun	9	Q And if that's correct, then there should
10	would have expected is not included in your royalty 10:31:09	10	be no need to make any adjustment to the portfolio 10:33:55
11	calculations; is that right?	11	royalty based on arguments that there are
12	A Correct.	12	alternatives; is that right?
13		13	_
	Q Now, in addition to the issue of	14	A That's my opinion.
14	fragmentation, by using the 2006 starting point, is		Q So if we could turn to Paragraph 86.
15	it correct to say that the strike that. I'm 10:31:28	15	Now, in paragraph 86 here in your report, 10:35:06
16	sorry.	16	you describe, if I understand correctly, the step
17	Is it fair to say that by using the 2006	17	where you convert the expected value to Google and
18	starting point, the consideration of alternatives is	18	expected value to Sun into an effective report for
19	already baked into the numbers?	19	the entire portfolio; is that right?
20	A Yes, I say that explicitly in my report. 10:31:48	20	A Correct. 10:35:24
21	Q When you say "explicitly," is that	21	Q Now, at the beginning of the deposition
22	Paragraphs 177 to 179 of your report?	22	you explained that there is a change that you would
23	A Yes. But in addition, there are a	2.3	make to the calculation here that would slightly
24	couple of footnotes.	24	decrease the denominator of the equation.
25	Q I hate to do this to you, but can you 10:32:12	25	A Yes. 10:35:41
	70		72
1	direct me to those? 10:32:14	1	O All right. 10:35:41
2	A Sure. One in verse paragraph	2	And do you have a calculation as to what
3		3	the percentage royalty would be after you make that
4		4	correction?
	write in prose. A Yes. Paragraph 76. Footnote 38, this is 10:32:29	5	
5			1
6	talking about Sun, but it's equally true about	6	or the first decimal place. It's a teeny effect.
7	Google.		
8	Q So in Footnote 38 let me catch up to		
9	you.		<u> </u>
10	In Footnote 38, you're referring to 10:32:58		
11	Paragraph 76. You say:		
12	"This is another example of a		
13	point I made earlier: What Sun		
14	knew in 2006 about its Java ME		
15	business and Sun's expectations 10:33:09		
16	with regard to the effects of an		
17	agreement with Google for an		
18	open-source Java-VM Android on its		
19	Java ME business would be fully		
20	reflected in its 2006 offer." 10:33:21		
21	And you say that's equally true of Google.		
22	Can you explain what you mean?		
23	A The expectations that the parties held		
24	about what would happen going forward are		
25	reflected in the agreements that they would have 10:33:32		
-	71		73

		1	agreement for that bundle of intellectual 11:26:37
		2	property.
		3	If you assume that Google did not know in
		4	2006 what it needed, then you can think about this
		5	in a couple of different ways. One, you can think 11:26:50
		6	of it as as an option to use some, all or none
		7	of the intellectual property, and what's the option
		8	value for being able to choose both what you want
		9	to use and the timing in which you use it. And the
		10	option value, I think, would be the portfolio 11:27:10
		11	value. That's what portfolio licenses are,
		12	essentially, in this setting.
		13	A third way to think about it is, suppose
		14	that Google didn't really want to use Java ME
		15	directly, but wanted to use a Java Virtual Machine 11:27:26
		16	and write in Java so that applications and OEMs
		17	would be attracted to the platform because they
18	Q That is your best economic advice?	18	thought Java was necessary. So they are going to
19	A Yes.	19	go out and write their own thing. But they
20	Q It would be fair to say that's your best 11:25:09	20	understood, or would understand, I think 11:27:43
21	economic judgment?	21	reasonably, that Sun, that had done this for many,
22	A Yes.	22	many years, had bumped into the problems that it
23	Q So is it correct to say that your best	23	would encounter as it as it went out and did its
24	economic judgment is that the value of the in-suit	24	own Java Virtual Machine. And as it solved those
25	IP in this case is the value of the Java ME 11:25:19	25	problems, it was likely to solve them in the same 11:28:02
	102		104
1	portfolio from 2006? 11:25:25	1	way that Sun had solved them and, hence, crossed 11:28:04
2	A Yes. I'm quibbling about this only	2	the boundaries of a Sun patent. So in that sense,
3	because, as I suggest in the previous paragraphs,	3	you can think of the portfolio license as an
4	paragraphs running up to this paragraph, there are	4	insurance against subsequent litigation if you
5	several ways to think about this. And in my 11:25:40	5	happened to have crossed a boundary when you, in 11:28:20
6	economic opinion, there would have been a	6	fact, were doing your own thing here.
7	portfolio negotiation. All right? And therefore,	7	Q So in each of those three scenarios,
8	if some subset of the portfolio is infringed, the	8	Google knows exactly what it wants. Google doesn't
9	value is the portfolio value.	9	know what it wants. Google is looking for insurance
10	Q Okay. 11:25:57	10	as it goes down the Java path. In each of those 11:28:41
11	A But I don't mean the way you frame it	11	three scenarios, the value of the IP-in-suit would
12	suggests that I've apportioned this to those, and	12	be the value of the 2006 portfolio; is that correct?
13	that's not quite what I've done.	13	A Yes, although I think you misstated
14	Q Okay.	14	that. In the first one, I assume that Java
15	I know this isn't in the report, but why 11:26:09	15	that Google knows what it needs. Okay? In the 11:28:56
16	don't you explain what it is that you have done in	16	second two, Google doesn't know what it needs. It
17	reaching the conclusions that you express in Section	17	just believes it might need some part of this.
18	K?	18	Q Okay.
19	A Three different things, three or four	19	A Okay? But again, we need to be careful
20	different things. First, if you think of the 11:26:21	20	about pushing this in a certain way to suggest 11:29:12
21	hypothetical negotiation as the parties knowing in	21	that this is a I mean, it would be this if it
22	2006 what intellectual property they needed,	22	had gone a different route and infringed a
23	Google knew what it needed, it needed these two	23	different set of patents. It would have been this
24	patents and it needed the 37 copyrights, then	24	if they had infringed 80 percent of the patents,
25	whatever the agreement was in 2006 was the 11:26:35	25	because it's the portfolio that they were buying 11:29:27
	103	1	105

		1	Q Okay. 11:38:21
		2	Is it appropriate to include damages for
		3	phones that have been activated as of the date of
		4	trial?
		5	A That have not? 11:38:39
	<u> </u>	6	Q That have, all phones that have been
		7	activated as of the date of trial.
		8	A That's a legal issue.
		9	Q As an economic matter, do you have an
		10	opinion? 11:38:47
		11	A Well, to the degree that Google gets, or
	<u> </u>	12	Oracle gets, a going-forward royalty, then it gets
		13	a royalty on the revenues those phones will
		14	generate going forward. So in that sense, it's
		15	not disadvantaged by not getting the damages at 11:39:01
		16	trial.
17	that.	17	So suppose I have a ramp-up in which I
18	If the jury were to apply a per-unit	18	have almost no revenue now, but a lot of revenue a
19	royalty, as opposed to a percentage of revenue	19	year from now on phones that were activated before
20	royalty, using activations as of April 16, 2012, do 11:36:11	20	trial. Then presumably, Oracle would get the 11:39:17
21	you believe there is any adjustment that should be	21	return on those phones when those revenues are
22	made in order to have that royalty be as of present	22	reported in the and the royalty rate was applied
23	value as of the date of trial?	23	to the royalty I mean, to the to the
24	A Perhaps, but this is really complex and	24	revenues.
25	goes to some legal issues I don't understand, but 11:37:04	2.5	Q To the extent that the outcome of the case 11:39:39
	110		112
1	let me sort of put out what I mean, the parties 11:37:08	1	is that there is an award of historical damages and 11:39:40
2	shouldn't be able to choose, ex post, the most	2	an injunction going forward that prevents Google
3	advantageous to them. All right? These are ex	3	from using from infringing the patents and
4	ante numbers, and you shouldn't be able to say,	4	copyrights, do you have an opinion as to whether
5	well, this one works better for me than this one, 11:37:21	5	it's appropriate to calculate a per-unit royalty 11:39:54
6	because the actual path over that period is	6	based on the activations prior to the entry of the
7	different than we anticipated. All right? That's	7	injunction?
8	the first point.	8	A I'm not sure that matters because if
9	The second point is that, clearly, an	9	you if you to some degree, the per-unit
10	assumption in this, an implicit assumption as I 11:37:35	10	royalty, as I said, is a steady-state royalty, so 11:40:15
11	think about it, is we're sort of talking about	11	you've sort of taken the forward revenues and
12	steady-state income on these phones. And to the	12	awarded them to Oracle as damages as of the date
13	degree there is a ramp-up, then these two numbers	13	of trial. That would reduce Oracle's negotiating
14	give you slightly different numbers. But I don't	14	position in the with the with the
15	know the evidence on that, and I don't think 11:37:48	15	injunction. 11:40:32
16	anybody has addressed it, so I have no way of	16	To the degree that you haven't done that
17	making an adjustment for that. But I would agree	17	and those royalties are forward, that would enhance
18	that the fact that you're talking about April 2012,	18	Oracle, so it just changes sort of slightly the
19	and that you have had a lot of phones that have	19	value of the injunctive remedy, depending upon
20	sort of what's the word I want been 11:38:04	20	whether or not more of it was loaded before the 11:40:45
1	Q Activated?	21	injunction or more of it came afterwards.
21		22	Q Now, in various points in your report, you
21	A activated, but don't have much		Q 110 m, m various points m your report, you
	A activated, but don't have much royalty on them yet, that's a bit of a problem.	23	address the issue of incompatibility, and you also
22			
22 23	royalty on them yet, that's a bit of a problem.	23	address the issue of incompatibility, and you also

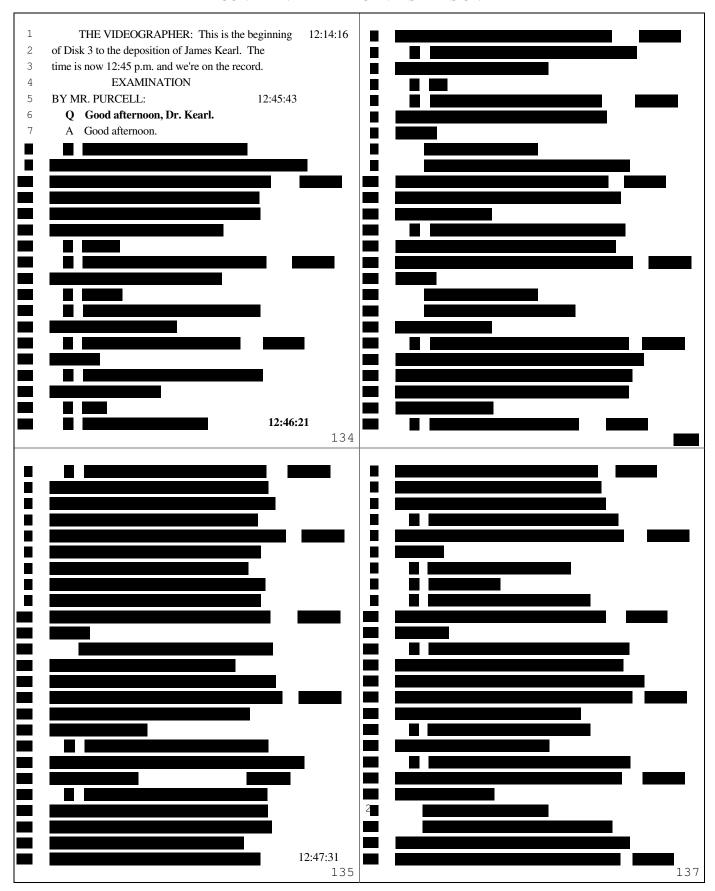

1	Q Can you tell me how you define 11:41:27	1	incompatibility with respect to the copyrights, is 11:44:44
2	"incompatibility" in the way that you have attempted	2	that considered in your report?
3	to compensate for it in your report?	3	A I don't want to use weasel words here,
4	A "Incompatibility," as I understand it,	4	but it may or may not be. And it depends upon
5	is a Dalvik VM versus a Java VM in Android. 11:41:46	5	something I don't have expertise in, and that's 11:45:18
6	Q In considering compatibility, do you	6	how to construct and read the contracts, the
7	consider the use of the 37 copyrighted APIs in a way	7	formal not the formalized contracts, but the
8	that is incompatible with the Java specification?	8	deals that were put onto paper in March of 2006.
9	A I'm not quite sure what that means. You	9	And I don't know enough about how to construct or
. 0	need to help me on that. 11:42:24	10	think about those to know whether or not the grant 11:45:37
. 1	Q Do you understand that Oracle contends in	11	of intellectual property in the one paragraph that
. 2	this case that not only is the Dalvik VM not	12	grants it envisions that Android was free to then
3	compatible, but that the way in which Google has	13	use this that Google was then free to use it in
4	used the Java APIs is incompatible with the Java	14	the way that it has used the APIs let me back
5	specification? 11:42:39	15	up. 11:45:56
. 6	A I understand what you just described,	16	If I took the 37 APIs and I licensed them
7	but I frankly don't understand the legal issue	17	and Android then then Google then put together
8	here. I mean, let me tell you what I mean, if	18	with them other APIs, which it then sort of used to
. 9	there is copyright infringement, presumably the	19	propagate applications that ran on a Java VM
0	infringement occurred because Google made the 37 11:43:02	20	Android, if that's what's envisioned in the 11:46:15
1	APIs close enough to Java APIs that Java writers	21	license, then yes, I've incorporated it. All
2	could, with minimal effort, write programs for	22	right? Okay?
3	Android in Java that would run on Android, but not	23	Q Okay.
4	run on other things. So they're not so	24	You understand that the 2006 negotiations
25	incompatible, or else they wouldn't be useful. 11:43:24	25	contampleted on Android that would be competible 11.44.2
	114		contemplated an Android that would be compatible, 11:46:3
1		1	
1 2	114		11
	Q All right. 11:43:28	1	correct? 11:46:33
2	Q All right. 11:43:28 Let me try to	1 2	correct? 11:46:33 A Right.
2	Q All right. 11:43:28 Let me try to Do you understand that Oracle contends	1 2 3	correct? 11:46:33 A Right. Q Do you also assume that Sun's ability to obtain the benefits of the Armstrong project
2 3 4	Q All right. 11:43:28 Let me try to Do you understand that Oracle contends that Sun would not license the 37 APIs on terms that	1 2 3 4	correct? 11:46:33 A Right. Q Do you also assume that Sun's ability to obtain the benefits of the Armstrong project
2 3 4 5	Q All right. 11:43:28 Let me try to Do you understand that Oracle contends that Sun would not license the 37 APIs on terms that would allow those APIs to be supersetted or 11:43:44	1 2 3 4 5	correct? 11:46:33 A Right. A Yes. Q Okay. All right. And so to the extent that Google's 11:47:30 infringement prevented Sun and Oracle from obtaining the benefits of the Armstrong project, have you fully accounted for that in your royalty
2 3 4 5 6 7 8 9 0 1 1 2 3 4 5 6 6 7 8 9 9 9 9 9 9 9 9 9 9 9 9 9 9 9 9 9 9	Q All right. 11:43:28 Let me try to Do you understand that Oracle contends that Sun would not license the 37 APIs on terms that would allow those APIs to be supersetted or 11:43:44 subsetted in comparison to the specification? A I've seen that discussion. And frankly, that's technical stuff, and I have no opinion about it. Q Okay. 11:44:00 Do you have an understanding as to whether well, assume with me that the problem is not that Google used the 37 APIs in a way that is different from the way that Sun used them, the specific APIs, but rather that Google used them with 11:44:16 other APIs that make it impossible for a program written to the Android specification using the 37 Java APIs and the remaining Android APIs to run on a Java platform? A Okay. 11:44:33 Q Further assume that Sun would not have agreed to that without substantial compensation.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	correct? A Right. Q Do you also assume that Sun's ability to obtain the benefits of the Armstrong project depended upon Android being compatible? MR. PURCELL: Object to the form. THE WITNESS: I don't know. You're venturing into technical areas that I can't opine on. BY MR. NORTON: 11:46:59 Q Is the reason why the Android revenues I'm sorry. Is the reason why the Armstrong revenues are included in the royalty calculation because that is value that Sun expected to get in the 2006 11:47:18 negotiation, but did not receive in the hypothetical world? A Yes. Q Okay. All right. And so to the extent that Google's 11:47:30 infringement prevented Sun and Oracle from obtaining the benefits of the Armstrong project, have you

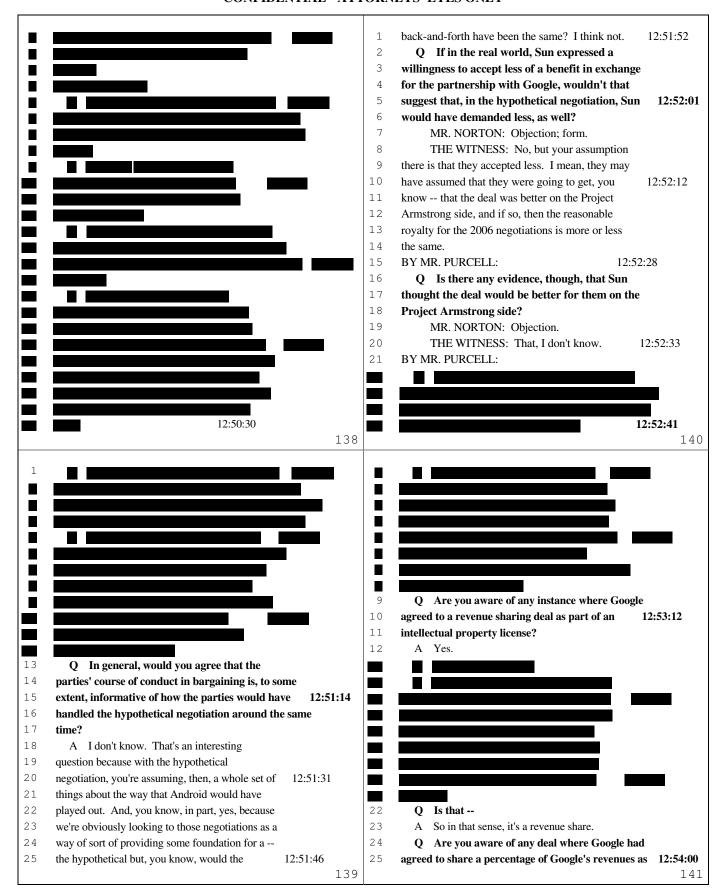

1	itself. 11:47:50	1 which v	you have addressed incompatibility is by 11:50:36
2	Q Subject to the fact that the number of	-	oring the benefits that Sun expected to get
3	your calculations are conservative?		rmstrong; and, two, to the extent that your
4	A Correct.		sent value calculation of the benefits to Sun
5	Q And so to the extent that any of your 11:47:59	-	rmstrong are conservative, it is necessarily 11:50:52
6	Armstrong calculations are conservative, you would		e that your adjustment to compensate for
	- · · · · · · · · · · · · · · · · · · ·		
7	have undercompensated for the harm of	_	atibility must also be conservative?
8	incompatibility, correct?		Agree.
9	A I don't know. It depends upon whether		All right.
10	or not you think the Armstrong expectations are a 11:48:27		s there any other calculation in your 11:51:06
11	reasonable way of thinking about what they lost		ch, other than the Armstrong benefits, that
12	when you've got an incompatible deal.		address the issue of incompatibility?
13	Q To the extent		That I can imagine or that I considered?
14	A If they are, then you fully incorporated		That you have
15	them. 11:48:41		umbers that you have actually calculated 11:51:26
16	Q To the extent that the Armstrong		orporated into your analysis.
17	calculations are an appropriate way to address the	.7 A I	
18	issue of incompatibility, your royalty addresses		All right.
19	incompatibility because it takes into consideration		ow, another term that appears in your
20	the Armstrong projections? 11:49:00	=	is "fragmentation." Do you understand 11:51:33
21	A Correct.	21 ''fragm	entation" to mean something different from
22	Q Nonetheless, to the extent that your net	22 ''incom	patibility''?
23	present value of the Armstrong benefit is	23 A '	Yes, with the caveat I'm not a technical
24	conservative, it necessarily does not capture all of	expert h	nere.
25	the harm of incompatibility, correct? 11:49:14	2.5 Q	Okay. 11:51:44
	118		120
1	A Well, I wouldn't put it that way. It's 11:49:17	1 W	Why don't you just give me the 11:51:44
2	conservative along a number of different		anding that you have employed, regarding the
3	dimensions that may or may not have anything to do		as to the term "fragmentation."
4	with compatibility. So I agree that my estimate	_	Well, I have fudged the issue, as has
5	is conservative, for example, the discount rate 11:49:28		dy else, about what the open-source license 11:51:57
6	issue that we discussed earlier. So it's	=	her it's the Apache license or the GPL.
7	conservative for a number of different points that		inderstanding and again, it's a
8	I've made. All right? But that's that means	-	d issue, so I'm not I may be wrong in
9	that it underestimates the true value for those		erstanding that the GPL would have led to
10	reasons, not necessarily for incompatibility. 11:49:45	,	gmentation than the Apache license. And 11:52:16
11		_	egree that Android was built and
	Q But if the only way in which you have		
12	addressed the harm of incompatibility is by		ted with the Apache license, then that's
13	factoring the Armstrong projections, then it is	=	erstanding of incremental fragmentation,
14	necessarily the case that if your Armstrong	-	eyond what we talked about earlier today,
15	projections are conservative, then your adjustment 11:49:59		vas the fragmentation that was going on 11:52:30
16	for incompatibility is conservative?		and would have occurred with open sourcing
17	MR. COOPER: Objection; form.		hatever license you would have used.
18	MR. PURCELL: Join.		Do you agree that the hypothetical license
19	THE WITNESS: Sure. I mean I'll agree to		ideally account for the incremental
20	that. I don't know what you mean by the, "Armstrong 11:50:22	_	ntation that would be expected to occur as a 11:53:02
21	projections are conservative." Again, that could go		f Google's infringing use?
22	to the discount. I've discounted them at too high a		The hypothetical license, yes, I agree.
23	discount rate.	23 Q A	All right.
24	BY MR. NORTON:	2 4 A	nd one question that you have is, in
25	Q To the extent that, one, the only way in 11:50:33	25 determi	ining the incremental fragmentation, are we 11:53:23
	119		121

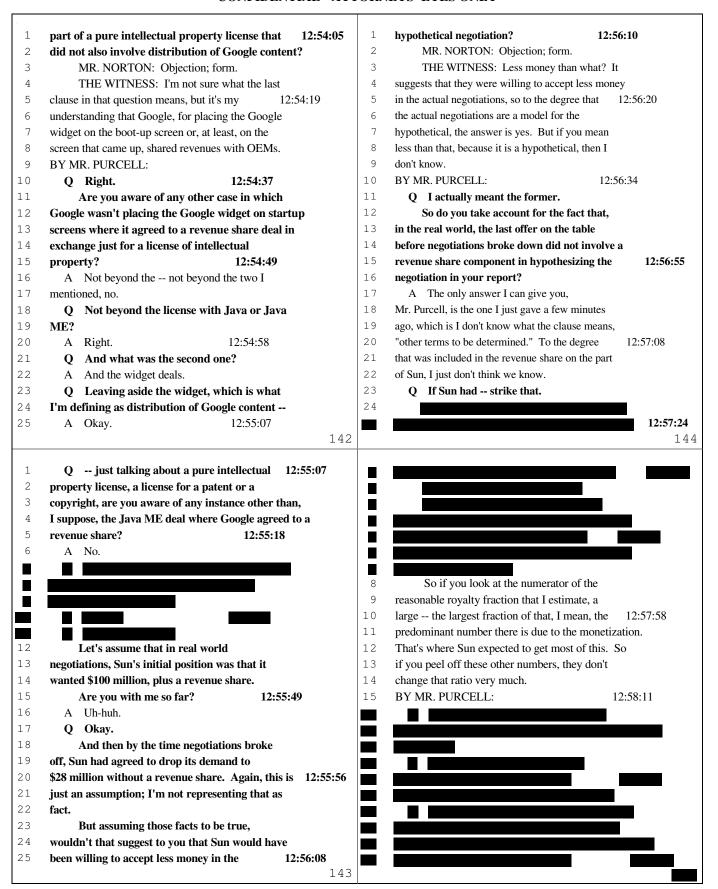

1 2 3	comparing Google's infringement to a 2006 11:53:26	1	
3	negotiation that would onen course under the CPL or	2	fragmentation as a result of open sourcing would be 11:56:27 exactly the same, regardless of whether Sun remained
	negotiation that would open source under the GPL or under Apache?	3	in control or Google remained in control, if the
4	-	4	parties had agreed in 2006 on an Apache license?
5	That was a terrible question. Let me try that again. 11:53:38	5	A No. That's an interesting question in 11:56:53
	9		<u> </u>
6 7	You want to measure the anticipated	6 7	that I don't think the issue of Sun's subsequent
	incremental fragmentation, right?	8	control has been factored into anybody's analysis,
8	A Yes. Based on some questions you asked		including mine, except to the degree the control
9	this morning, or earlier today, there are two	9	was embedded in the license itself, the type of
10	potential incremental fragmentations. To the 11:53:52	10	license. So to the degree that Sun and Google are 11:57:11
11	degree that Java ME was fragmented before, and	11	no longer partners in the hypothetical world, and
12	became fragmented in the normal course of	12	because Sun's not weighing into the development
13	business, I don't know whether it was or it	13	here, that that I just don't know whether that
14	wasn't, but your question implied that it may have	14	would have led to more fragmentation or not. I
15	been there may have been some baseline 11:54:08	15	really don't know. 11:57:28
16	fragmentation. Then going forward, you would have	16	Q Well, do you understand that one of the
17	expected that fragmentation to continue.	17	sources of fragmentation is the fact that Android is
18	And we had a discussion earlier about	18	incompatible, not just that it's open source, but
19	whether an open-source license would have enhanced	19	that it's incompatible?
20	that, that baseline fragmentation of Java ME. That 11:54:18	20	A Yes. 11:57:49
21	would have been baked into the negotiation because	21	Q All right.
22	the parties knew that Sun knew that it was going	22	And if in the 2006 negotiation the parties
23	to have a open-source license on this matter.	23	expected that let's just assume the parties
24	Okay?	24	expected they would use an Apache license for Java
25	Then to the degree that Sun would never 11:54:36	25	and Android in the 2006 negotiation, but that Sun 11:58:13
Ì	122		124
1	have accepted an open-source license that was 11:54:39	1	would remain in a position where it could ensure 11:58:16
2	potentially more fragmenting than a different	2	that Android remained compatible with the existing
3	open-source license, then that would not have been	3	
4	-	4	Java specifications.
	built in, although it may have been if they had		In that scenario, the anticipated fragmentation as of 2006 would be less than the 11:58:28
5	agreed on that license. It's really unclear on 11:54:56	5	
6	which license they were going to agree on, and it's	6	anticipated fragmentation as a result of the
7	my understanding that's, in part, why the	7	hypothetical license, correct?
8	negotiations fell apart, was over that license.	8	A Possibly.
9	Q All right.	9	Q Can you give me probably?
10	So if I understand you correctly, part of 11:55:07	10	Let me ask you this way: Who has a 11:58:45
11	what you're wrestling with is if Android is released	11	greater interest in ensuring that Android remained
12	under the Apache license, and it was anticipated by	12	compatible with existing Java? Google or Sun?
13	the parties in 2006 that Android would be released	13	A Sun did, but it's not clear that Google
14	under the Apache license, then you wonder whether	14	had an interest in sort of going out and
15	there is any incremental fragmentation as a result 11:55:32	15	specifically fragmenting. I mean, Google had an 11:59:00
16	of open source	16	interest in creating its own platform. And to the
17	A No. In that case, I don't wonder. In	17	degree that that's incompatible, that is, itself,
18	that case, I assume there is not.	18	a fragmentation, I agree. That a fragment,
19	Q As the result of open sourcing?	19	however you want to think about this, fork off of
20	A No, as a sole source yeah, that's 11:55:40	20	this. Okay? But the reason I gave the answer I 11:59:14
21	right, of the the license would have that	21	did is my reading of the record is that Google
22	fragmentation, anticipated fragmentation, built	22	was, itself, very concerned about fragmenting the
23	into it, the 2006, not the hypothetical, the 2006	23	Android platform. So to the degree that it didn't
24	license.	24	allow for further fragmentation, one. Second step
25	Q Is it your opinion that the extent of 11:56:24	25	is, to the degree and I'm going to get the 11:59:34
	123		125

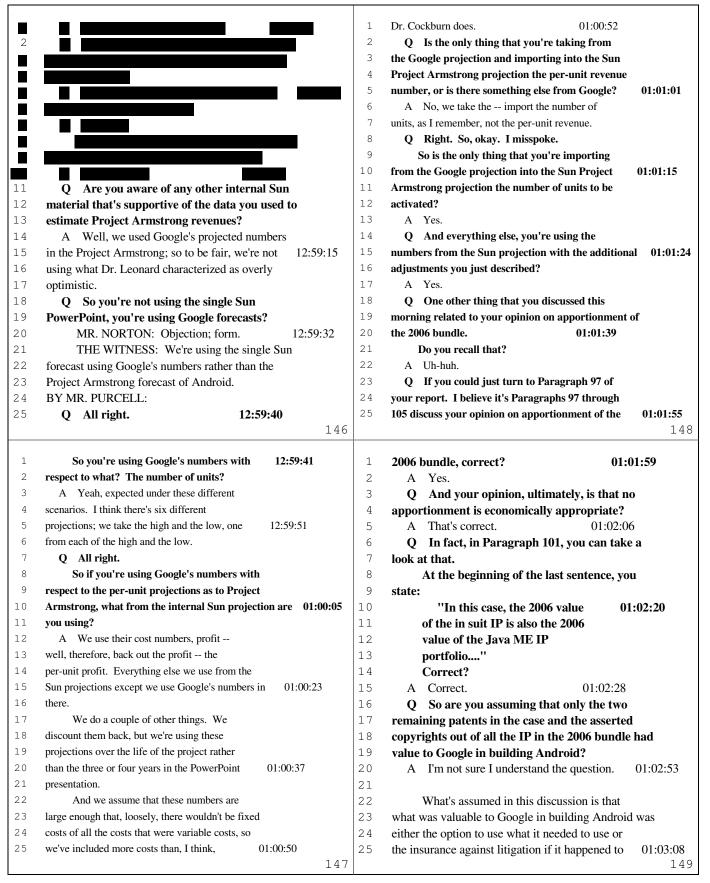

1	names wrong here the TCK and the Android 11:59:36	1 Q Is that a economically important 12:02:0
2	equivalent of the TCK were more or less testing	2 difference?
3	the same thing, then there is no reason to believe	3 A Maybe.
4	that you've got fragmentation beyond sort of	4 Q What consideration have you given to
5	what the initial step. 11:59:47	5 whether it's economically important? 12:02:
6	Q Right.	6 A Well, we're cursed with hindsight,
7	The initial step, which is, in fact,	7 right? I mean, the the smartphones have sort
8	fragmentation?	8 of taken the market, although not worldwide, but
9	A It is fragmentation.	9 in the U.S., and feature phones have become less
0	Q All right. 11:59:55	10 important. It's unclear whether this was clear in 12:02:
1	Now, with respect to the fragmentation	11 2005, 2006. When Sun or when Apple announced
2	that is the result of the initial step, is there	12 its new iPhone, it was unclear whether this was
3	anyplace in your report where you have attempted to	going to be a successful product or not. So at
4	calculate the value of or the harm of that	the time, I don't know that the expectations of
		_
5	fragmentation? 12:00:08	15 these two different phones were all that 12:02:55
6	A No.	16 different.
7	Q So that's unquantified throughout your	Q Based on the Google projections you have
8	report?	seen, did Google expect smartphones to be more
9	A Correct.	valuable to its business than feature phones?
0	Q And are you aware of any way of 12:00:13	20 A Yes. 12:03:11
1	calculating that fragmentation from the infringing	Q Based on the Armstrong projections, did
2	use?	22 Sun expect smartphones to be more valuable to its
3	A No.	business than feature phones on a per-unit basis?
4	Q Hold on one second.	24 A I don't know because I don't know the
5	I want to talk for a minute about the 12:00:37	25 universal business with smartphones. I know it 12:03
		15 Q Okay. 12:04:18 16 A But that doesn't mean that the aggregate
	12:01:53	15 Q Okay. 12:04:18 16 A But that doesn't mean that the aggregate

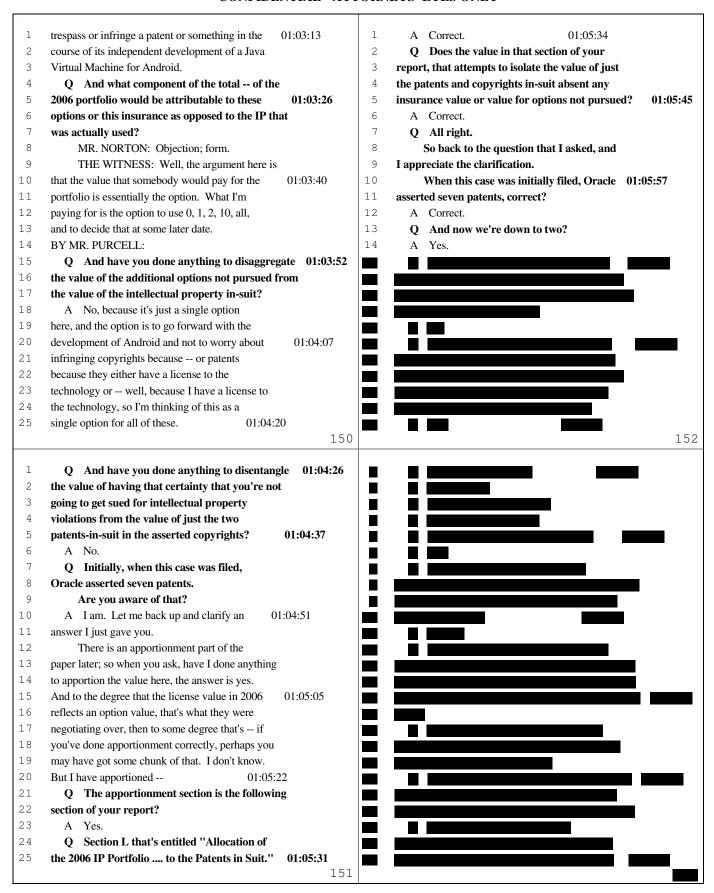

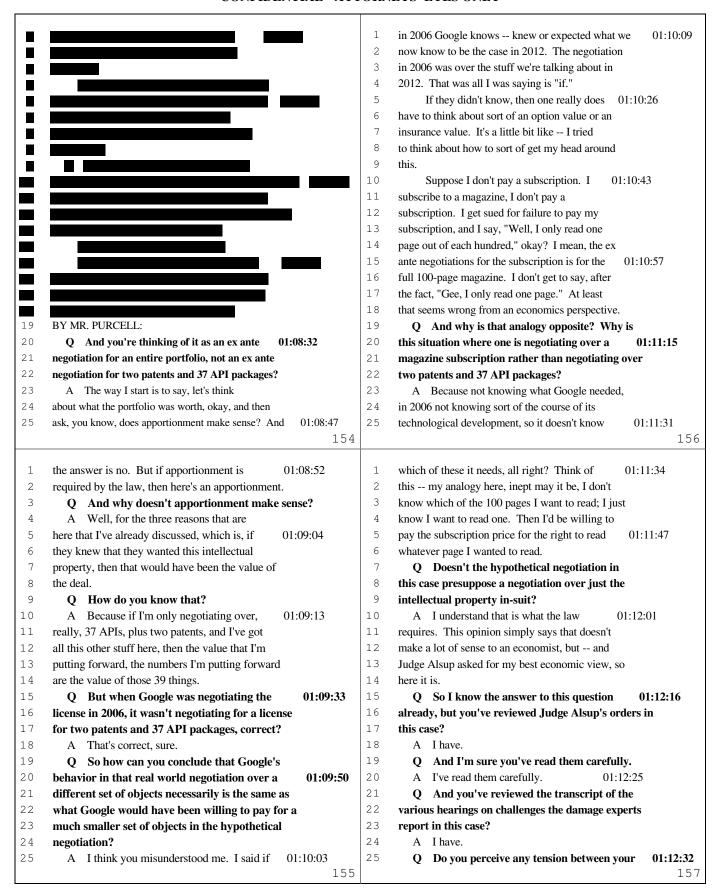

1	opinion in Section K of your report and any of 01:12:33	1	Q Is there any way you can narrow that range 01:14:37
2	Judge Alsup's orders or statements	2	based on the information that you have?
3	MR. COOPER: Objection as to form.	3	A Not really. Again, it's unclear who had
4	MR. NORTON: Join.	4	the obligation to put forward the argument here,
5	THE WITNESS: I can imagine there will be 01:12:42	5	but since I have to rely on the record, that's 01:15:07
6	some tension, yes.	6	sort of what the experts have done, as opposed to
7	BY MR. PURCELL:	7	going out and doing this independently, there's
8	Q Do you intend to tell the jury that, in	8	nothing in this record that I could use to make
9	your opinion, no apportionment of the 2006 IP bundle	9	that apportionment or that division.
10	is appropriate as a matter of economics? 01:12:50	10	Q If you were starting from scratch and one 01:15:21
11	A I expect I'll be permitted to tell the	11	of the parties retained you to address this
12	jury what Judge Alsup tells me I can tell the	12	question, is there some set of information that you
13		13	
	jury, so		would want them to provide to you so you could
14	Q That's a very diplomatic way of putting	14	apportion the percentage of Android profits
15	it. 01:13:05	15	attributable to the alleged copyright infringement? 01:15:32
16	So moving forward just a little bit to	16	A As I indicated this morning, I think the
17	paragraph 118 of your report, there's a section on	17	shift in market share is potentially useful but
18	"Other Copyright Damages," and it starts with a	18	has been excluded, so
19	section on "Disgorgement of Infringer's Profits."	19	But if I were to do it, I would probably
20	A Yes. 01:13:27	20	look at the shift in the market share. What 01:15:55
21	Q Do you see that?	21	fraction of the incremental revenues was due to the
		22	incremental market share due to the APIs.
		23	Q So would that be along the lines of
		24	looking at the benefits provided to Android by the
	150	25	copyrighted APIs and then the incremental increase 01:16:14
	158		160
1	Q And then in Paragraph 122, the next 01:13:45	1	in market share as a result of those benefits being 01:16:18
2	paragraph, you state that neither party has offered	2	in the software?
3	a viable methodology for separating out Android	3	A Correct.
4	profits attributable to the infringement versus	4	Q And what's your understanding regarding
5	Android profits not attributable to the 01:13:58	5	what benefits the copyrighted APIs provide to the 01:16:26
6	infringement?	6	Android platform, if any?
7	A Correct.	7	A That's a technical issue. I'll tell you
8	Q And then paragraph 124 on the next page	8	my understanding of it but not it's not an
9	starts with:	9	opinion in that sense.
10	"Based on the admissible 01:14:10	10	That it provided a couple of benefits 01:16:40
11	evidence in this matter, I am not	11	sort of going forward, that is, in 2006. I think
12	aware of a quantitative method to	12	the record suggests, or at least there's argument
13	estimate the percent of Android	13	in the record that Google believed that it needed a
14	revenue or profit that is due to	14	Java-based platform. It needed to appeal to Java
15	the alleged copyright 01:14:18	15	application writers or people who would write in 01:17:01
16	infringement."	16	Java.
17	Do you see that?	17	The OEMs were accustomed to using Java,
18	A Yes.	18	in fact, were taking Java ME licenses, many of
19	Q And as a result of that, you conclude that	19	them. And, therefore, having APIs that said, if
20	the percentage of Android profit attributable to the 01:14:24	20	you write in your accustomed fashion, an 01:17:16
21	alleged copyright infringement is not zero but less	21	application, it's going to work on this new machine
22	than 100 percent, correct?		or this new virtual machine and/or the
23	A Yes.	22	modifications you have to make aren't very large;
24	Q That's a pretty broad range.	24	that is, it's kind of within the genre of of
25	A It is. 01:14:36	25	that was one benefit to them. 01:17:43
	159		161
	137		101

1		1			
	And the second benefit, as I understand 01:17:45	1	So I suggest that it has it's useful 01:20:13		
2	it, there is some evidence that getting to the	2			
3	market quickly mattered, and to the degree that	3	purposes, but but I also didn't go off and do		
4	there's testimony in evidence at trial that shows	4			
5	that getting to the market quickly was really the 01:18:00	5	and get numbers that aren't a lot different than 01:20:28		
6	principal way to do that was through Java, then it	6	the conjoint from actual market behavior, so		
7	had that benefit, as well.	7	Q If we could turn to Paragraph 203, and		
8	Q You looked at Dr. Shugan's conjoint	8	this actually, I think, is in the following exhibit.		
9	analysis as part of your work in this case, correct?	9	In the last sentence of Paragraph 203, you write:		
10	A I did. 01:18:15	10	"However, the direction of 01:21:11		
11	Q And Dr. Shugan, his conjoint analysis	11	bias on Professor Shugan's results		
12	included some testing and evaluation of the relative	12	caused by these omitted features is		
13	importance of certain features of a smartphone	13	ambiguous and can only be fully		
14	platform to consumers?	14	assessed if a new survey were		
15	A Correct. 01:18:29	15	conducted that included the omitted 01:21:20		
16	Q And I believe Dr. Shugan tested seven	16	features."		
17	features of smartphone platforms in his conjoint	17	Do you see that?		
18	analysis; is that correct?	18	A Correct.		
19	A Correct.	19	Q That's what we've just been discussing?		
20	Q And I think that you write in your report 01:18:47	20	A Yes, with regard to the market share 01:21:25		
21	that Dr. Shugan's omission of other potentially	21	estimates. Well, the potential bias in these		
22	relevant features of a smartphone platform might	22	coefficients which might cancel out when you're		
23	have balanced his relative importance results,	23	doing a ratio.		
24	correct?	24	Q Let's leave the market share calculations		
25	MR. NORTON: Objection; form. 01:18:59	25	aside and just talk about the relative importance 01:21:35		
	162		164		
1	THE WITNESS: No. 01:19:00	1	features. 01:21:37		
2	BY MR. PURCELL:	2	With the relative importance features, do		
3	Q Did I say "balanced"?	3	you have any particular opinion about the degree of		
4	A Yes, you did.	4	bias in Dr. Shugan's relative importance features?		
5	Q I meant to say "biased," excuse me. Let 01:19:02	5	A The paragraph says it's ambiguous. It's 01:21:51		
		1 2	The paragraph says it's amorgaous. It's 01.21.51		
6	me say that again.	6	difficult to know which way the bias goes.		
6 7	me say that again. In your report, you concluded that	1			
		6	difficult to know which way the bias goes.		
7	In your report, you concluded that	6 7	difficult to know which way the bias goes. Q But are you reasonably confident that the		
7 8	In your report, you concluded that Dr. Shugan's omission of other potentially relevant	6 7 8	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either		
7 8 9	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his	6 7 8 9	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction?		
7 8 9 10	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? 01:19:17	6 7 8 9	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01		
7 8 9 10 11	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? A Well, no, that's not quite correct.	6 7 8 9 10 11	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to		
7 8 9 10 11	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? A Well, no, that's not quite correct. There are two different kinds of biases here. I	6 7 8 9 10 11 12	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to forecasting and looking at the ratio of the coefficients. And if you look at the ratio of the coefficients, you could have substantial bias in		
7 8 9 10 11 12 13	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? 01:19:17 A Well, no, that's not quite correct. There are two different kinds of biases here. I think the my pretty extensive analysis of	6 7 8 9 10 11 12 13	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to forecasting and looking at the ratio of the coefficients. And if you look at the ratio of the		
7 8 9 10 11 12 13 14	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? 01:19:17 A Well, no, that's not quite correct. There are two different kinds of biases here. I think the my pretty extensive analysis of conjoint suggests that it's likely to be biased; that it omitted important things. Which direction 01:19:35 those biases go is a very hard thing to tease out.	6 7 8 9 10 11 12 13 14	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to forecasting and looking at the ratio of the coefficients. And if you look at the ratio of the coefficients, you could have substantial bias in		
7 8 9 10 11 12 13 14	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? 01:19:17 A Well, no, that's not quite correct. There are two different kinds of biases here. I think the my pretty extensive analysis of conjoint suggests that it's likely to be biased; that it omitted important things. Which direction 01:19:35 those biases go is a very hard thing to tease out. With regard to the market share forecast	6 7 8 9 10 11 12 13 14 15	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to forecasting and looking at the ratio of the coefficients. And if you look at the ratio of the coefficients, you could have substantial bias in the numerator/denominator, and as long as it's the 01:22:17 same percentage, then it cancels out and you get a more or less accurate estimate of the relative.		
7 8 9 10 11 12 13 14 15 16 17	In your report, you concluded that Dr. Shugan's omission of other potentially relevant smartphone platform features might have biased his relative importance results, correct? 01:19:17 A Well, no, that's not quite correct. There are two different kinds of biases here. I think the my pretty extensive analysis of conjoint suggests that it's likely to be biased; that it omitted important things. Which direction 01:19:35 those biases go is a very hard thing to tease out. With regard to the market share forecast and predictions which use and I'm not speaking	6 7 8 9 10 11 12 13 14 15 16 17	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to forecasting and looking at the ratio of the coefficients. And if you look at the ratio of the coefficients, you could have substantial bias in the numerator/denominator, and as long as it's the 01:22:17 same percentage, then it cancels out and you get a more or less accurate estimate of the relative. So to the degree that we're talking about

Which direction 01:19:35 those biases go is a very hard thing to tease out. With regard to the market share forecast and predictions which use and I'm not speaking loosely here use sort of a coefficient that's estimated, that bias is likely to matter. In the 01:19:54 relative share, you have it's a ratio of coefficients, and to the degree that the bias is the same and the numerator and the denominator, it	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	difficult to know which way the bias goes. Q But are you reasonably confident that the bias isn't particularly significant in either direction? A No, I'm not, but again, loosely, this is 01:22:01 the difference between using a coefficient to forecasting and looking at the ratio of the coefficients. And if you look at the ratio of the coefficients, you could have substantial bias in the numerator/denominator, and as long as it's the 01:22:17 same percentage, then it cancels out and you get a more or less accurate estimate of the relative. So to the degree that we're talking about speed relative to applications and that those are accurately measured by the proxies he uses, then 01:22:34 even if they're biased, as long as they're biased in the same direction by roughly the same amount, you get the right ratio.		

1	A I wasn't trying to validate his 01:22:51	1	.5 as the ratio of these. We cannot find that 01:26:02
2	conclusions. I was simply looking at an	2	number in the conjoint analysis; it's nowhere to be
3	independent way of trying to assess the importance	3	found. The number that comes out of the conjoint
4	of speed versus applications.	4	analysis is .7, so and Dr. Cockburn just has a
5	Q And what work did you do to try to assess 01:23:00	5	single sentence in his report that says: "From the 01:26:19
6	the importance of speed versus applications?	6	conjoint analysis, I have learned" or something
7	A This is a long answer.	7	to the effect "that it's .5."
8	Q That's fine.	8	No reference, no footnote, no cite to the
9	A Dr. Cockburn uses first, uses eBay	9	table or anything. So that's where we are in that.
10	data and I use the eBay data. I use the same data 01:23:19	10	You can think about the econometrics as validation, 01:26:36
11	he does. He then uses an approach in which he	11	if you want, of the conjoint or an independent way
12	writes his own maximum likelihood function and	12	of looking at the relative value.
13	runs an algorithm to maximize that. He does	13	In my analysis in the back in the
14	what's known in economics as a bootstrap, which is	14	Reasonable Royalty section, I used .8. I just take
15	a way of getting at the standard errors of the 01:23:39	15	the simple mean between .7 and .9 of the two 01:26:55
16	coefficient, yes, the standard errors of the	16	different kinds of estimates.
17	coefficient.	17	And were The Court to find that the
18	When we implemented his we just took	18	
19	his stuff and implemented. It takes, literally,	19	conjoint or the jury to find the conjoint wasn't reliable for a whole set of reasons, I have an
20	240 computer hours to run, so it's 10 days from 01:24:00	20	
			1
21	when you push the button until something pops out	21	independent way of apportioning the copyrights that
22	the other end.	22	I don't think anybody else has at this point.
23	Dr. Leonard's criticism of Dr. Cockburn	23	Q All right.
24	was that he could write a likelihood function that	24	And what's your independent way of
25	could be estimated much simpler that was the 01:24:15	25	apportioning the copyrights? 01:27:23
	166		168
1	conjugant of Dr. Loonard's Dr. Cookhum. In 01:24:20	1	A. It would be the econometric 01,27,24
1	equivalent of Dr. Leonard's Dr. Cockburn. In 01:24:20	1 2	A It would be the econometric. 01:27:24
2	fact, he didn't need to write it; he could simply	3	Q That you just described? A Yes.
3	use a canned program to do this. And if you use		
4	his program, it takes a tenth of the time; it takes	4	Q Okay.
5	12 hours or 10 hours. 01:24:34	5	Just wanted to be sure you weren't leading 01:27:31
6	So in all of the econometrics I did, I	6	into something else that you had done.
7	did the Dr. Leonard implementation. I did not do	7	A No.
8	the Dr. Cockburn.	8	Q So we've gone through the universe of
9	Now, we tested the difference, and the	9	everything you've done with respect to your
10	coefficients are more or less the same in the two 01:24:50	10	econometric analysis on copyright apportionment? 01:27:38
11	to sort of the second decimal place; sometimes	11	A Yes. I mean, there are lots of details
12	they're a little bit higher, sometimes a little bit	12	in the econometrics themselves, but that's the big
13	lower. So it appears that using the more	13	picture.
14	simplified approach of Dr. Leonard gets you into	14	Q Dr. Shugan and Dr. Cockburn use strike
15	the same gets you roughly the same. So that's 01:25:08	15	that. 01:27:55
16	the long lead into this.	16	In Dr. Shugan's and Dr. Cockburn's view,
17	Using that approach, then we went out and	17	the primary benefit provided to Android by the
18	retrieved information on applications and on the	18	copyrighted APIs was an increased number of
19	various phones, brought that applications data in	19	applications, correct?
20	and meshed it with the data that Dr. Cockburn had 01:25:29	20	MR. NORTON: Objection. 01:28:07
21	used and estimated a version of the Cockburn model	21	THE WITNESS: Correct.
22	using the Leonard technique with applications and	22	BY MR. PURCELL:
23	find that the ratio of speed to applications is	23	Q And they use
24	about .9 so applications to speed is about .9.	24	Dr. Cockburn uses, essentially, an
25	One other observation: Dr. Cockburn uses 01:25:58	25	increased number of applications as a proxy for the 01:28:13

12	10	applications startup time, 01:28:43	10	BY MR. PURCELL: 01:31:02
A Yes. Q So he uses a relative importance figure of 7.85 percent for availability of applications, 01:28:50 Professor Shugan? A Yes. Q Would he be reasonable to use that 7.85 percent figure as an estimate of the percentage of Android revenue attributable to the copyrighted 122 of Android revenue attributable to the copyrighted 223 oftware? 234 MR. NORTON: Object. 145 THE WITNESS: In what setting? I'm not 246 Supposed to other features of the Android 257 Sure — 01:29:18 268 O Well, in the sense of disaggregating the 269 injunts to Android revenues that are not due to the 270 copyrighted APIs? 280 A I don't think so, no. 281 O Well, in the sense of disaggregating the 282 in copyrighted APIs? 283 A Well, the conjoint analysis doesn't 284 really get to revenues. It gets — purportedly, 285 in a cstimate of the utility that people place 286 of things, but there's no way to go — at least, I oli:29:39 296 of things, but there's no way to go — at least, I oli:29:37 307 A Well, the conjoint analysis doesn't 308 on tisce an easy path from there to revenues. 309 If 7.85 percent of consumers are most influenced by the availability of applications? 310 A Yes. 310 A Yes. 311 A Well, that's been excluded by by bottom the tool to the copyrighted APIs were removed from the Android software, what — what oli:32:08 310 A Yes. 311 A Yes. 312 A Yes. 313 A Mell, that's been excluded by the software oli:29:10 32 O Well, in the sense of disaggregating the injunts to Android revenues that are not due to the copyrighted APIs were removed from the Android software, what — what oli:31:56 change. 310 A Yes. 310 A Yes. 311 A Yes. 312 A Yes. 313 A Mell, that's been excluded by the software oli:29:10 32 O Well, in the sense of disaggregating the injunts to Android revenues that are not due to the copyrighted APIs were removed from the Android software, what — what oli:31:56 change. 310 A Yes. 310 A Yes. 311 A Yes. 312 A Yes. 313 A Well, the case that figure of the software oli:29:10 31 A Yes. 310 A Yes. 310 A Yes. 310 A Well, the case of the	11	respectively."	11	Q And do you have any methodology in mind
14 Q So he uses a relative importance figure of 15 7.85 percent for availability of applications, 01:28:50 15 15 15 16 17 15 17 15 17 15 17 15 17 15 17 17	12	Do you see that?	12	for translating the 7.85 percent utility effect into
15 7.85 percent for availability of applications, 01:28:50 15 Judge Alsup. Apparently, the Sawtooth software 01:31:	13	A Yes.	13	a market share effect?
Professor Shugan? A Yes. Would be be reasonable to use that Q Would be be reasonable to use that 7.85 percent figure as an estimate of the percentage of Android revenue attributable to the copyrighted of Android revenues that are not due to the copyrighted April of Android revenues that are not due to the copyrighted April of Android revenues. It gets — purportedly, it's an estimate of the utility that people place of on things, but there's no way to go — at least, I of 1:29:39 to on things, but there's no way to go — at least, I of 1:29:39 to on things, but there's no way to go — at least, I of 1:29:50 is due to the availability of applications? A I don't think so. Q How would you go about translating, if you could, that 7.85 percent figure into an apportoment of the value of the software of 1:30:12 attributable to the APIs that enable the availability of applications? A Ro, NORTON: Object. 10	14	Q So he uses a relative importance figure of	14	A Well, that's been excluded by by
17	15	7.85 percent for availability of applications, 01:28:50	15	Judge Alsup. Apparently, the Sawtooth software 01:31:18
18	16	Professor Shugan?	16	has a button you push, and it tells you what
7.85 percent figure as an estimate of the percentage of Android revenue attributable to the copyrighted of Android revenue attributable to the copyrighted of Android revenue attributable to the copyrighted of Android software? 22	17	A Yes.	17	happens to the market share. That's the button
of Android revenue attributable to the copyrighted APIs as opposed to other features of the Android software? APIs as opposed to other features of the Android software? MR. NORTON: Object. THE WITNESS: In what setting? I'm not sure 01:29:18 BY MR. PURCELL: 01:29:19 Q Well, in the sense of disaggregating the inputs to Android revenues that are not due to the copyrighted APIs? A I don't think so, no. 01:29:28 Really get to revenues. It gets purportedly, it's an estimate of the utility that people place on things, but there's no way to go at least, I 01:29:39 Q If 7.85 percent of the benefit provided by the software of the availability of applications; I sidue to the availability of applications; I so the availability of applications? Q How would you go about translating, if you could, that 7.85 percent figure into an apportionment of the value of the software availability of applications? MR. NORTON: Object. 22 But that's been excluded because, as I understand the argument that Dr. Leonard made and Judge Alsup and the part in Google is that because of the bias, the potential bias in that number, you 01:31:56 change. 1 can't get a reliable estimate of the market share 01:31:56 change. 3 Q Other than the Sawtooth method that Judge Alsup excluded, can you think of any other way to go from the 7.85 percent relative consumer 01:32:08 perference figure to a market share figure? A No. Q If you were asked to estimate the likely change in market share if the copyrighted APIs were removed from the Android software, what what would you do? MR. NORTON: Object. THE WITNESS: I would use the econometrics to predict the reduction in willingness to pay, and 01:32:58 then, you know, there's dispute on all of these markers, and I understand the argument that Dr. Leonard made and Judge Alsup and the part in Google is that because of the bias, the potential bias in that number, you 01:31:52 C O Well, in the sense of disaggregating the inputs to Alighter think so. 0 1:29:28 The WITNESS: I would use the e	18	Q Would he be reasonable to use that	18	that Dr. Shugan pushed. So it translates it by
APIs as opposed to other features of the Android software? MR. NORTON: Object. THE WITNESS: In what setting? I'm not 24 Judge Alsup and the part in Google is that because of the bias, the potential bias in that number, you 01:31:56 change. PARE PURCELL: 01:29:19 1 can't get a reliable estimate of the market share 01:31:56 change. Well, in the sense of disaggregating the inputs to Android revenues that are not due to the copyrighted APIs. A I don't think so, no. 01:29:28 5 of the bias, the potential bias in that number, you 01:31:56 change. A Well, the conjoint analysis doesn't really get to revenues. It gets — purportedly, it's an estimate of the utility that people place on things, but there's no way to go — at least, I 01:29:39 10 don't see an easy path from there to revenues. 12	19	7.85 percent figure as an estimate of the percentage	19	sort of looking at all of the other sort of
22 MR. NORTON: Object. 23 MR. NORTON: Object. 24 THE WITNESS: In what setting? I'm not 25 sure 01:29:18 26 Well, in the sense of disaggregating the inputs to Android revenues that are not due to the copyrighted APIs? 26 Q Well, in the sense of disaggregating the inputs to Android revenues that are not due to the copyrighted APIs? 27 A Idon't think so, no. 01:29:28 28 Q Why not? 29 Q Well, in the sense of disaggregating the inputs to Android revenues that are not due to the copyrighted APIs? 30 A Idon't think so, no. 01:29:28 41 Judge Alsup and the part in Google is that because of the bias, the potential bias in that number, you 01:31:56 change. 20 Other than the Sawtooth method that Judge Alsup excluded, can you think of any other way to go from the 7.85 percent relative consumer 01:32:08 preference figure to a market share figure? 31 A Well, the conjoint analysis doesn't really get to revenues. It gets - purportedly, it's an estimate of the utility that people place on things, but there's no way to go - at least, I 01:29:39 to on things, but there's no way to go - at least, I 01:29:39 to on things, but there's no way to go - at least, I 01:29:39 to on things, but there's no way to go - at least, I 01:29:39 to on things, but there's no way to go - at least, I 01:29:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on things, but there's no way to go - at least, I 01:39:39 to on	20	of Android revenue attributable to the copyrighted 01:29:05	20	relative utility effects, utility from the 01:31:37
MR. NORTON: Object. THE WITNESS: In what setting? I'm not 25 sure — 01:29:18 170 BY MR. PURCELL: 01:29:19 Q Well, in the sense of disaggregating the 3 inputs to Android revenues that are not due to the 4 copyrighted APIs? A Idon't think so, no, 01:29:28 Q Why not? A Well, the conjoint analysis doesn't 7 A Well, the conjoint analysis doesn't 8 really get to revenues. It gets — purportedly, 9 it's an estimate of the utility that people place 10 on things, but there's no way to go — at least, I 01:29:39 11 don't see an easy path from there to revenues. 11 wouldn't be reasonable to assume that roughly 15 7.85 percent of the benefit provided by the software 01:29:57 16 is due to the availability of applications? A Idon't think so. 0 How would you go about translating, if you 20 applications? A Idon't think so. 12 Q How would you go about translating, if you 20 applications? A Idon't think so. 15 Percent figure into an apportionment of the value of the software 01:30:12 attributable to the APIs that enable the 22 availability of applications? MR. NORTON: Objection. 17 A Well, you can use the econometrics to resolve that dispute. 18 BY MR. PURCELL: 01:32:58 think you have to do it 19 But then you could then use parties — I	21	APIs as opposed to other features of the Android	21	different kinds of things.
THE WITNESS: In what setting? I'm not sure 01:29:18 24 Judge Alsup and the part in Google is that because of the bias, the potential bias in that number, you 01:31:52 1 170 1 1	22	software?	22	But that's been excluded because, as I
25 sure — 01:29:18	23	MR. NORTON: Object.	23	understand the argument that Dr. Leonard made and
170 1 BYMR. PURCELL: 01:29:19 1 can't get a reliable estimate of the market share 01:31:56 2 Change. 3 Q Other than the Sawtooth method that 4 copyrighted APIs? 4 Judge Alsup excluded, can you think of any other way 1 to go from the 7.85 percent relative consumer 01:32:08 6 Q Why not? 7 A Well, the conjoint analysis doesn't 7 A No. 8 really get to revenues. It gets — purportedly, 8 it's an estimate of the utility that people place 9 change in market share if the copyrighted APIs were on things, but there's no way to go — at least, I 01:29:39 10 removed from the Android software, what — what 01:32:08 0 Fr. 85 percent of consumers are most 11 would you do? 12 MR. NORTON: Object. 13 influenced by the availability of applications; 14 wouldn't be reasonable to assume that roughly 7.85 percent of the benefit provided by the software 01:29:57 16 is due to the availability of applications? 17 A Well, you can use the econometrics to apportionment of the value of the software 01:30:12 20 predict the reduction in willingness to pay, and 01:32:58 17 A Well, you can use the econometrics to apportionment of the value of the software 01:30:12 21 attributable to the APIs that enable the availability of applications? 22 mattributable to the APIs that enable the availability of applications? 23 MR. NORTON: Objection. 24 But then you could then use parties — I	24	THE WITNESS: In what setting? I'm not	24	Judge Alsup and the part in Google is that because
BY MR. PURCELL: O1:29:19 O Well, in the sense of disaggregating the inputs to Android revenues that are not due to the copyrighted APIs? A I don't think so, no. O1:29:28 O Why not? A Well, the conjoint analysis doesn't really get to revenues. It gets — purportedly, it's an estimate of the utility that people place on things, but there's no way to go — at least, I O1:29:39 O If 7.85 percent of consumers are most influenced by the availability of applications, it wouldn't be reasonable to assume that roughly 7.85 percent of the benefit provided by the software o1:29:57 is due to the availability of applications? A I don't think so. O How would you go about translating, if you could, that 7.85 percent figure into an apportionment of the value of the software o1:30:12 attributable to the APIs that enable the availability of applications? MR. NORTON: Objection. A Well, you can use the econometrics to predict the reduction in willingness to pay, and o1:32:58 attributable to the APIs that enable the availability of applications? MR. NORTON: Objection. THE WITNESS: I think you have to do it Discrete that reliable estimate of the market share o1:31:56 change. C Other than the Sawtooth method that Judge Alsup excluded, can you think of any other way to go preference figure to a market share figure? A No. O If you were asked to estimate the likely on the reality econsumer on the likely on the new asked to estimate the likely or the preference shade to evalue of the copyrighted APIs were remeder on things, but then's A No. R Policy of the Android software, what what o1:32:08 MR. 1 25 the way that Professor Shugan does and Professor 01:30:28 25 think Dr. Cockburn did something that was 01:33:10	25	the way that Professor Shugan does and Professor 01:30:28	25	think Dr. Cockburn did something that was 01:33:10
	_			173

1	reasonably innovative and creative here, which is 01:33:11	1	look at applications in this case. The conjoint 01:35:38
2	to look at parties that were bidding individuals	2	analysis appears to be quite seriously biased
3	who were bidding on two different phones, two	3	or it's got some problems that keep it from
4	different operating systems, within a reasonable	4	being very useful in that regard, so I think you
5	period of time and asking if the willingness to pay 01:33:22	5	had to move some other place. 01:35:58
6	fell below a certain level, would they switch the	6	Q Prior to Judge Alsup's excluding the
7	phones switch from one from an Android to	7	econometric analysis, have you reached any tentative
8	another non-Android phone.	8	conclusions about the drop in market share that
9	And if they did, you just count that up	9	would be likely if the copyrighted APIs weren't
10	and divide by the number of people in the 01:33:37	10	available to Google? 01:36:10
11	population, or the sample you're looking at, and	11	A No, we never finished that analysis.
12	that's a measure of the market share shift due to	12	Q You didn't have any preliminary results
13	that effect. You could do exactly the same thing	13	that would shed any light on that?
14	with with applications as he did with speed.	14	A We have the coefficient. We could back
15	But to get there, as I indicated earlier this 01:33:54	15	it out pretty quickly but we used a coefficient 01:36:20
16	morning, you then have to deal with with the	16	for purposes of the relative speed versus
17	problem of the phone price not changing when the	17	application, but we never did the calculation, to
18	relative when the willingness to pay for that,	18	my knowledge. I don't recall having done the
19	so the consumer surplus consumer surplus falls,	19	calculation.
20		20	
21	•	21	
22	price?	22	applications, is that in the report or appendices
23	It got excluded on that basis, and I have		somewhere?
	not done further work on that because of the	23	A It is, it is.
24	exclusion, but that, at least, is a sensible place	24	Q Could you actually direct me to it?
25	to start. And as I said this morning, it doesn't 01:34:26	25	A Sure. It's Paragraph 401, and Exhibit 01:36:47
	111		
1	make sense to argue that price would go down 01:34:29	1	F10 provides, I think, the estimate of 01:37:24
2	because that's the price the OEMs are selling this	2	coefficients. 401 is the paragraph that describes
3	at. It's not Google that's selling these phones.	3	the results.
4	So it's hard to believe that Google could	4	Q Thank you.
5	put a product out in the market that was less 01:34:39	5	I'd like to talk a little bit about your 01:37:40
6	functional and expect the OEMs to eat the	6	analysis of Oracle's and Sun's lost profits from
7	consequences of that, but you'd have to think about	7	Java ME.
8	how the shift would occur in that case, and you	8	A Yes.
9	might be able to do it as a composite between the	9	Q Just to orient you, that discussion starts
10	market share change and some predicted price 01:34:53	10	on Paragraph 126 of your report at page 50. 01:37:54
11	change.	11	on a magnification of joint report at page 500 01:57:57
12	In either case, assuming that Google has		
13	to make it up to the OEMs, it's a revenue decline		
14	for Google, and as I said this morning, it's not		
15	clear to me that just looking at the market share 01:35:06		01:38:18
16	shift below and assuming the cost price doesn't		01.50.10
17	change doesn't get you in about the right place.		
18	But once Judge Alsup cut that off, we		
19	quit working on it.		
20	Q So had Judge Alsup not excluded that piece 01:35:20		01:38:29
21		21	
22	of the econometric analysis, do you think you could	22	Q And in Paragraph 139, that paragraph starts off with the statement:
	have used that econometric analysis to estimate		
23	change in market share?	23	"However, while I agree some
24	A Yes, we were prepared to with what we	24	apportionment of Java ME lost
25	call the enhanced econometric model to actually 01:35:35	23	profits to the iPhone is 01:38:49

1	appropriate, I do not agree with 01:38:51	1	is a dispute between these two experts about a 01:42:02
2	Dr. Cox's formula for doing so."	2	factual matter, and the trier of fact will have to
3	In apportioning Java ME lost profits due	3	decide on that, not an expert. There's no economics
4	to Android versus due to other causes, what other	4	involved in deciding that.
5	causes did you look at? 01:39:04	5	Q Sorry to interrupt, but I think you said 01:42:14
6	A The context here is, as I recall is	6	Dr. Cockburn had taken issue with the strategic
7	that Dr. Cox says the iPhone came along, all of	7	forecast.
8	this is attributable or, at least, a large	8	Did you mean Dr. Leonard?
9	fraction of this is attributable to the iPhone.	9	A Dr. Leonard.
10	Dr. Cockburn response Professor Cockburn 01:39:21	10	Q Dr. Cockburn used the strategic forecast, 01:42:21
11	responds, "No, it's not the iPhone. It wasn't the	11	and Dr. Leonard said that was not the appropriate
12	effect."	12	forecast?
13	The question really is, when you look at	13	A Yes. Sorry. I got that backwards.
14	the expected sales or expected placements going	14	So there's a factual dispute there that I
15	forward, did they have included in them some 01:39:41	15	don't weigh in on. There is then there's a 01:42:32
16	expectation about the iPhone? If they did, then	16	couple of issues associated with Java ME being used
17	it's only the unexpected success of the iPhone that	17	for non-handset devices, Blu-ray devices, soda pop
18	would not would have sort of creates an	18	machines, a variety of things where Java ME is in,
19	apportionment problem because, otherwise, they're	19	and Dr. Cox argues they should be.
20	already there. They've already been taken out and 01:39:59	20	
21	no apportionment is necessary.		
22	So you've got to argue this is the		
23	unexpected part of this. And it's hard to know		
24	what the expectations with regard to the iPhone.		
25	Our reading of this in 2006 is that people were 01:40:11		01:43:10
	178		180
1	mildly surprised that the iPhone did as well as it 01:40:16		
2	did, so it appears that there were unexpected		
3	results here that would not have been included in		
4	the forecast.		<u></u>
5	Dr. Cox has a reasonably complex way of 01:40:28		
6	doing this, and we just take the proportional		
7	market shares, just as the paragraph says.		
8	Q But other than the iPhone, were there any		
9	other factors that you looked at and considered that	9	Q Focusing on the issue of whether the
10	might have caused Sun's projected forecast to fall 01:40:43	10	strategic forecast or some other forecast is 01:43:46
11	short in the real world?	11	appropriate, if you were to adopt Dr. Leonard's
12	A I don't think so.	12	methodology rather than Dr. Cockburn's, do you have
13	Q Now, the	13	any sense of how your bottom line number of about
14	A I need to remind myself of what this	14	\$56 million would be affected?
15	section says. 01:40:56	15	A Do you mean Dr. Cox's methodology or 01:44:02
16	Q Okay.	16	Dr. Leonard's? Dr. Cox is takes on the
17	A Well, the answer is, yes, we did. In	17	Q Correct.
18	some cases, yes; in some cases, no.	18	If you were not to use the strategic
19	Dr. Cockburn comes back and says:	19	forecast but you were to use the forecast that
20	"The strategic forecast is not 01:41:47	20	Dr. Cox prefers, have you done any calculation as to 01:44:18
21	the right one to use because of a	21	how that would affect your bottom line?
22	variety of reasons."	22	A I have not.
23	The reasons may or may not hold water, but	23	Q Do you have any sense of how using
24	I don't have any expertise to evaluate sort of those	24	Dr. Cox's preferred forecast would affect the bottom
25	reasons, so I simply say in Paragraph 131 that this 01:41:58	25	line number? Would it cut it in half? Would it 01:44:29
	179		181

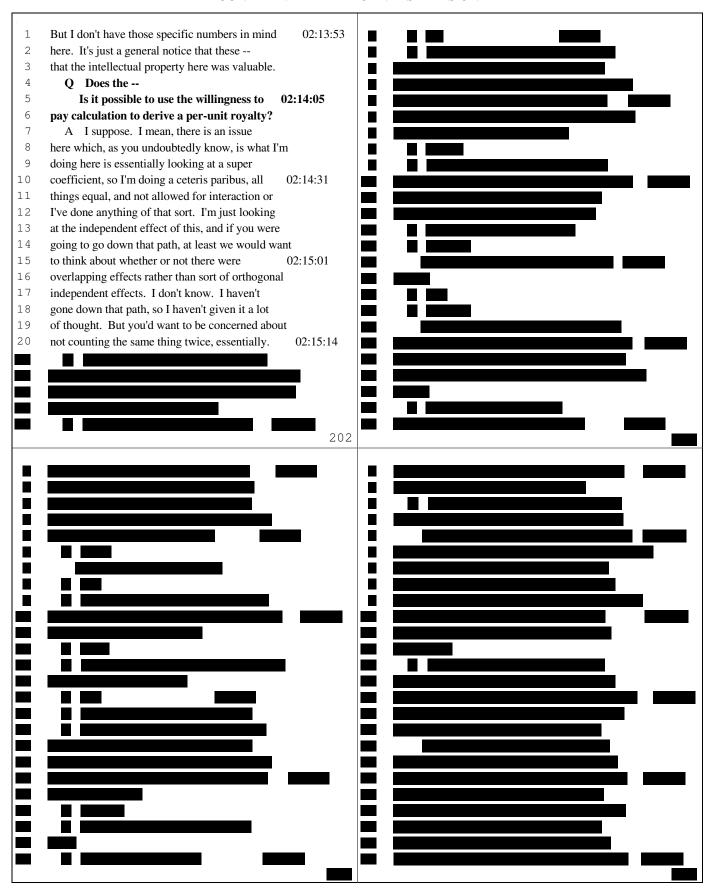

1	measure. 02:03:45	1	And I assume that Dr. Leonard must not have seen it 02:06:05
2	Q Do you know whether Professor Cockburn's	2	because he doesn't criticize it, but you can put in
3	analysis of eBay data included new phones?	3	an alternative auxiliary regression that does make
4	A I don't. I mean, they're stripped	4	sense in which the coefficients have the right
5	phones, so I don't know I'd have to go back and 02:03:56	5	signs, for example, and get results similar to 02:06:23
6	look at the data. I don't recall.	6	Professor Cockburn's.
7	Q So you're not aware of whether Professor	7	Again, let me make sure that the answer
8	Cockburn has actually analyzed whether the effect on	8	here is understood in the same context as my
9	its econometrics analysis if you look exclusively at	9	earlier answers with Mr. Purcell, which is, I'm
10	the new phones 02:04:07	10	using the Leonard implementation of the Cockburn 02:06:43
11	A No, as I recall, he did that and gets	11	model; I'm not estimating the 240-hour estimation
12	about the same results.	12	every time.
13	Q And do you disagree with his conclusion	13	Q Right. Okay.
14	that when he focuses exclusively on new phones, he	14	And the fix that you described of
15	gets the same results? 02:04:18	15	Professor Cockburn's econometric analysis, that had 02:06:59
16	A No, I don't. As I indicated in both the	16	to do with patents that are no longer in this
17 18	conjoint analysis and the econometric analysis, the first thing we did, as I think in response to	18	lawsuit? A Yes.
19		19	
20	Judge Alsup's charge, was to simply ask whether it was implemented as represented it was implemented, 02:04:35	20	Q Now, the you have an enhanced model for willingness to pay, correct? 02:07:14
21	and we were able to replicate Professor Cockburn's	21	A Correct.
22	work, all of his work, and Professor Shugan's	22	Q And you calculated a willingness to pay
23	work, all of their work.	23	value for the incremental speed benefits associated
24	Q But it's your opinion that use of eBay	24	with the '104 patent, right?
25	data in Professor Cockburn's econometric study is a 02:04:49	25	A Well, I estimated, to be technical 02:07:32
25	194		196
1	reasonable proxy? 02:04:53	1	I'm careful here. I estimated the speed benefits 02:07:34
2	A Yes.	2	associated with the Linpack score, and as I made
3	Q And then you're aware of the critiques	3	clear in my report, I'm not opining on the
4	that Dr. Leonard has made of the econometrics	4	technical effect of the patents. That's a
5	analysis; is that right? 02:05:00	5	different issue, but I've assumed that technical 02:07:46
6	A I am.	6	effect of the patent is what the Oracle engineers
7	Q And you considered those in your report?	7	have said it is and then gone forward with that
8	A I have.	8	assumption.
9	Q And you, nonetheless, conclude that the	9	Q Oracle engineers conducted tests that
10	econometrics analysis is useful and reliable 02:05:07	10	would indicate the according to them, the effect 02:08:01
11	A Yes.	11	of removing the '104 patent and the '205 patent from
12	Q as performed by Professor Cockburn?	12	an Android phone, correct?
13	A Yes, with one exception. There is	13	A That's correct.
14	and it has to do with the memory patents that are	14	Q And you rely on their tests?
15	excluded. Professor Cockburn did a fix for that 02:05:25	15	A Yes. 02:08:12
16	that I think is problematic. Until that part of	16	Q And there are no Google tests, correct?
17	the until those patents were dropped, I did a	17	A That's correct.
18	fix that I think is better, but it was a fix, and	18	Q And the Linpack score, you agree, is a
19	my fix gets tighter results but roughly the same results as his fix did but is easier to interpret 02:05:47	20	useful proxy for the speed that consumers care
20	•	21	about? 02:08:23
21	and easier to implement.	22	A Yes, in the sense that it's a useful
23	This is an auxiliary regression. It	23	proxy in that it bridges from the patent to
24	turns out it's embedded in the code so you actually don't see the regression output, but if you see the	24	something that you can measure. It's useful in that sense. I mean, we're sort of stuck with the
25	regression output, it doesn't make a lot of sense. 02:06:02	25	Linpack score, like it or not, because it's the 02:08:49
20	195		Limpack score, like it or not, because it's the 02:08:49
	195		1 9 7

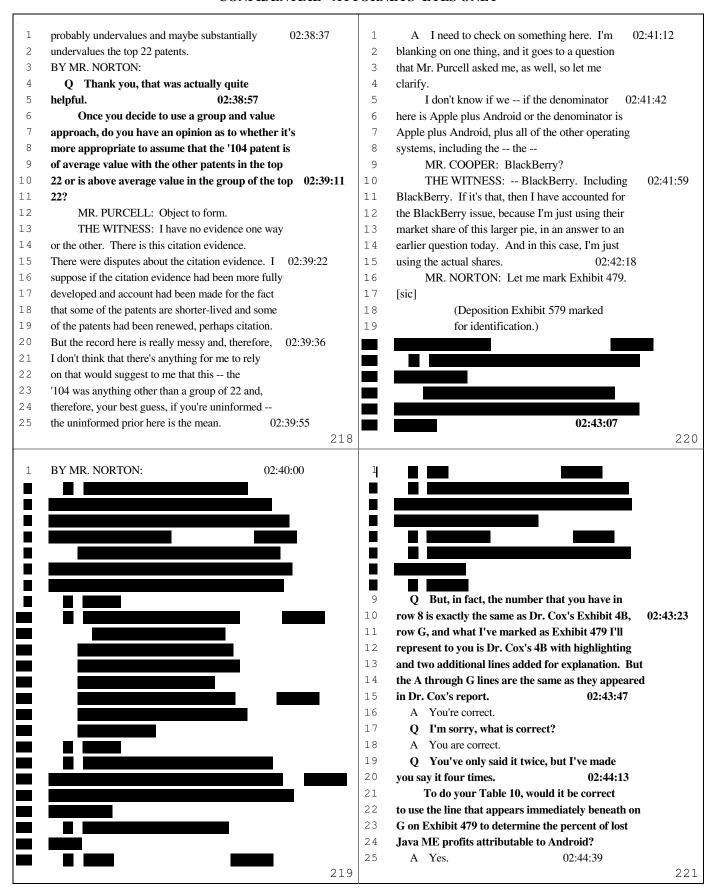

,			
1	score in which the patents' effect on speed was 02:08:53	1	report let me know if you're there. 02:11:59
2	measured. So in that sense, it's useful and it	2	A I'm there.
3	has has regression validity in the sense that	3	Q You state:
4	it has coefficients that have, you know, standard	4	"The marginal value
5	errors that make it reliable estimates of the 02:09:08	5	contribution of the patents and 02:12:14
6	coefficients for that, but we use it because of	6	copyrights in suit is substantial."
7	the fact that it's tied to the patents.	7	A I'm sorry, 41?
8	Q And then when you did your willingness to	8	Q Paragraph 41.
9	pay analysis, you assumed that the there would be	9	MR. COOPER: Oh, Paragraph 41.
10	an 80 percent reduction in the Linpack score if the 02:09:34	10	MR. NORTON: Did I say "Page"? 02:12:22
11	'104 patent were not included in the Android phone,	11	MR. COOPER: I thought you said "Page 41."
12	correct?	12	Sorry.
13	A Approximately 80 percent, yes.	13	THE WITNESS: Yes.
14	Q And you described that 80 percent estimate	14	BY MR. NORTON:
15	as conservative, correct? 02:09:46	15	Q So you state there: 02:12:28
16	A Yes.	16	"The marginal value
17	Q And by "conservative," that means that	17	contribution of the patents and
18	your use of it would tend to understate willingness	18	copyrights in suit is substantial."
19	to pay?	19	A Yes.
20	A Could, yes. 02:09:56	20	Q And there, are you referring to what's 02:12:34
21	Q Now, the you conclude that consumers	21	indicated by the engineering assessments and the
22	would pay an additional \$21 more for an average	22	willingness to pay?
23	priced Android phone if it had the incremental speed	23	A Yes. I put it slightly differently,
24	benefits of the '104 patent indicated by the Linpack	24	which is, I'm looking at the econometric
25	test; is that right? 02:10:17	25	evaluation of the willingness of the technical 02:12:51
	198		200
1	A Do you want to refer me to the 02:10:19	1	assessments. 02:12:55
2	Q Sure, I'm sorry. I think you can look at	2	Q Okay.
3	paragraph 400 and Table F9.	3	And you say:
4	A Yes.	4	"Google would presumably have
5	Q So do I understand correctly that based on 02:10:43	5	been willing to pay up to this 02:12:59
6	your econometric study, consumers would pay \$21 more	6	amount for the in-suit patents and
7	for a phone that had the speed benefits indicated by	7	copyrights."
8	the Linpack test by the engineers than they would	8	A Yes.
9	for a noninfringing Android phone?	9	Q When you say, "Google presumably would
10	A Yes. 02:10:59	10	have been willing to pay up to this amount," does 02:13:07
11	Q And you also used your enhanced model to	11	"this amount" refer to the per-unit willingness to
12	calculate willingness to pay for applications; is	12	pay?
13	that right?	13	A No.
14	A That's correct.	14	Q What does that refer
15	Q And if we look at paragraph 401, you found 02:11:07	15	A This is a general comment that I use 02:13:14
16	that limiting the number of applications available	16	the econometrics since it's been excluded from
17	on the phone between 6,000 and 40,000 results in a	17	market share for the simple proposition that the
± /	-	18	consumers valued this. There's a lot of talk in
	reduction in willingness to pay between, on average,		the record about they value speed, they value
18	reduction in willingness to pay between, on average, 12 and \$22: is that right?	1 1 9	
18 19	12 and \$22; is that right?	19	
18 19 20	12 and \$22; is that right? A That's correct. 02:11:28	20	applications, and so on, and what the econometrics 02:13:31
18 19 20 21	12 and \$22; is that right? A That's correct. 02:11:28 Q So the willingness to pay for the assumed	20	applications, and so on, and what the econometrics 02:13:31 shows is they do.
18 19 20 21 22	12 and \$22; is that right? A That's correct. 02:11:28 Q So the willingness to pay for the assumed incremental increase in applications is between 12	20 21 22	applications, and so on, and what the econometrics 02:13:31 shows is they do. And, therefore, that Google, if it had
18 19 20 21 22 23	12 and \$22; is that right? A That's correct. 02:11:28 Q So the willingness to pay for the assumed incremental increase in applications is between 12 and \$22 per average-priced Android phone?	20 21 22 23	applications, and so on, and what the econometrics 02:13:31 shows is they do. And, therefore, that Google, if it had understood that in 2006, would have put a high
18 19 20 21 22	12 and \$22; is that right? A That's correct. 02:11:28 Q So the willingness to pay for the assumed incremental increase in applications is between 12	20 21 22	applications, and so on, and what the econometrics 02:13:31 shows is they do. And, therefore, that Google, if it had

	1 2	to Android are, in fact, correctly allocated to 02:22:20 Android?
	3	A Yes and no. I mean, we took the
	4	expenses for what they were, and we talked about
	5	the way or tried to analyze how Dr. Cox then 02:22:34
	6	uses those how he accounts for those expenses,
	7	whether he amortizes them, over what period of
	8	time he amortizes them, and so forth. And I made
Q Now, if you were to assume that Google did	9	some criticisms about that, but we've not gotten
onot have good noninfringing alternatives to the APIs 02:19:5		involved in sort of whether these numbers in the 02:22:51
or the '104 patent, and you also assume that the	11	Google reports are accurate. I mean, I have no
willingness to pay calculations are accurate, would	12	way of knowing.
that suggest to you that the reasonable royalty for	13	Q So you have no way of determining whether
4 the '104 patent and for the copyrights would both be	14	or not the actual expense items that show up on the
substantially in excess of what you calculated on 02:20:19	15	P&L really are properly allocated to Android as 02:23:02
Table 8?	16	opposed to some other Google business operation?
7 MR. PURCELL: Object to the form.	17	A I do not.
8 THE WITNESS: I really don't think you can	18	Q So you just take that one on faith?
go there, Mr. Norton. The the what the	19	A Well, I don't take it on faith. I
or reasonable I mean, the noninfringing substitutes 02:20:34	20	assume that, following Dr. Cox, these numbers are 02:23:14
available to Google in 2006, as I've argued in	21	right, and if at trial I've been careful here;
dismissing Dr. Leonard's arguments about this, are	22	it's an important point, which is what I've
embedded in the offer, so if I believe they agreed	23	tried to do is set forth methodologies for doing
to the February 2006 offer, that embeds and reflects	24	these things with an understanding that those
5 whatever noninfringing substitutes there are, and so 02:20:51	25	methodologies are implemented with a set of 02:23:29
	06	20
1 you can't, then, make a side argument about that. 02:20:55	1	assumptions, some of which are empirical 02:23:31
That's in the number that you're going to allocate	2	assumptions, in which The Court will have better
		ussumptions, in which the court will have conten

So if the evidence is these costs are less, or they should have been amortized differently, then the methodology would have you know, I would tell the jury, if asked, that the 02:23:57 jury needs to make those adjustments, or I would make the adjustments for the jury and present the numbers to them. Q Now, on the topic of infringer's profits, Mr. Purcell asked you some questions about double recovery, and I want to approach it a little bit differently. When you cal well, when you calculated the reasonable royalty for copyright, that is based on the 2000 net present value of Sun's anticipated profits from the 2006 transaction, correct? A Using Google's estimates of Sun's

1	A Yes. That was poorly put. It's not 02:24:49	1	Is that much clearer? 02:29:54
2	Google's estimates of Sun's success; it's Google's		A Yes.
3	estimates of Android's success.	3	MR. COOPER: And you're asking him to
4	Q But the number that you are using is based	4	assume that's the statement of the law?
5	on Sun's anticipated profits? 02:24:58	5	MR. NORTON: I am. 02:29:59
6	A Yes.	6	MR. COOPER: Okay.
7	Q So to the extent that the copyright	7	BY MR. NORTON:
8	statute says that a Plaintiff is entitled to actual	8	Q And then am I correct in understanding
9	damages	9	that the copyright royalty that you have calculated
10	I'll ask you to assume that the copyright 02:25:16	10	is based on anticipated profits that Sun would have 02:30:08
11	statute provides that a Plaintiff is entitled to	11	received from a hypothetical license?
12	actual damages which can be measured as a lost	12	A Correct.
13	license or as a lost profit, and in addition to	13	Q Okay.
14	actual damages, the Plaintiff is entitled to	14	In that case, and assuming that my
15	infringer's profits to the extent not already 02:25:31	15	statement of the law is correct, is there any 02:30:21
16	counted in the actual damages.	16	overlap between your measure of the copyright,
17	A Okay.	17	reasonable royalty and your measure of the copyright
18	Q So with that understanding of actual	18	infringer's profits?
19	damages, is there any overlap between the	19	A May I ask you a clarifying question?
20	infringer's profits and the copyright royalty? 02:25:46	20	Q Okay. 02:30:40
21	A I don't know.	21	A I mean, is what you're getting at here
22	MR. COOPER: I'm going to retrospectively	22	that there could have been a difference between
23	object to the question as to form.	23	the expected profits to which was used in
24	MR. NORTON: I understand. I'll stick	24	calculation of the reasonable royalty and the
25	with that, though. 02:26:48	25	actual profits that history produced? Is it a 02:30:49
	210		212
1	THE WITNESS: Just a second. Can I talk 02:27:01	1	distinction between the forecast and actual? 02:30:56
2	to my attorney off the record?	2	Q Well, I guess my point is just
3	MR. NORTON: Let's go off the record.	3	I don't believe my question depends on
4	THE VIDEOGRAPHER: The time is 2:27 p.m.	4	that distinction, so obviously, my question is still
5	and we'll go off the record. 02:27:07	5	not clear. 02:31:07
6	(Discussion held off record.)	6	If actual damages can be measured
7	THE VIDEOGRAPHER: The time is now	7	Is there anything in your
8	2:29 p.m. and we're back on the record.	8	Let me ask it this way: Is there anything
9	MR. COOPER: Counsel, I've had an	9	in your measure of the copyright reasonable royalty
10	opportunity to confer with Dr. Kearl while we were 02:29:08	10	that factors in Google's infringer's profits? 02:31:20
11	off the record, and it's apparent that Dr. Kearl	11	A I don't think so.
12	didn't understand your question.	12	Q Okay.
13	Can I ask you to rephrase it, please?	13	A Because the reasonable royalty is based
14	MR. NORTON: Of course. I'm sorry, that	14	on the it starts, as we've discussed a number
15	was confusing. 02:29:17	15	of times, on the 2006 license and the implied 02:32:50
16	BY MR. NORTON:	16	royalty that comes out of that, that included, not
17	Q So assume that the copyright statute	17	infringement, but compliant Android.
18	identifies actual damages and infringer's profits,	18	So the projected profits don't include
19	and actual damages can be measured one of two ways:	19	whatever incremental profits, if any, whichever
2.0	Either lost profits or a lost license fee, a 02:29:32	20	they go, negative or positive, that might have 02:33:11
21	hypothetical license. And the copyright statute	21	occurred because you have a an Android machine
22	further provides that the Plaintiff is entitled to	22	that is not or an Android product that is not
23	actual damages, plus infringer's profits to the	23	compliant.
24	extent the infringer's profits are not taken into	24	Q Okay.
2.5	consideration in the actual damages. 02:29:50	25	Now, you talked a little bit about 02:33:29
	211		213

Q Do you have an opinion as to whether the upper bound approach is a reasonable version of group and value? Q Do you have an opinion as to whether the upper bound approach is a reasonable version of group and value? A There are things that go different 21 directions here. One is as indicated in my and break and professor Cockburn and Dr. Leonard appeal to in that they - they're unlike the portfolios right? And the difference here is that you could imagine that there are alternative paths through 22:37:16 2 surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the surveys the license renewal literature and the stimates of the value function for the - for surveys the license renewal literature and the surveys the lice	15	reasonableness of the upper bound approach? 02:33:55	15	
decide on this matter. Q Do you have an opinion as to whether the uper bound approach is a reasonable version of group and value? A There are things that go different 2 directions here. One is as indicated in my 22 directions here. One is as indicated in my 23 report. Professor Cockburn uses three studies, picks one that seemed to be out of the norm for 24 because the academic studies in this area, and I provide 02:34:31 21 21 24 25 surveys the license renewal literature and the 21 24 25 surveys the license renewal literature and the 22:34:35 24 25 surveys the license renewal literature and the 25 surveys the license renewal literature and the 26 25 surveys the license renewal literature and the 27 26 26 27 27 20 27 27 2	16	A No. We simply waited for The Court to	16	
19 upper bound approach is a reasonable version of group and value? 02:34:10 20 have a particular technology, then it is a bit 02:36:58 1 21 4 22 and Dr. Leonard appeal to in that they they're unlikely to be those kind of portfolios, right? 23 24 25 24 25 24 25 24 25 25	17	decide on this matter.	17	If you think that the Java ME portfolio is
19 upper bound approach is a reasonable version of group and value? 02:34:10 20 have a particular technology, then it is a bit 02:36:58 1 21 4 22 and Dr. Leonard appeal to in that they they're unlikely to be those kind of portfolios, right? 23 24 25 24 25 24 25 24 25 25	18	Q Do you have an opinion as to whether the	18	*
A There are things that go different directions here. One is as indicated in my caport. Professor Cockburn uses three studies, picks one that seemed to be out of the norm for the academic studies in this area, and I provide 02:34:31 and 02:34:31 are some evidence from a paper by John Putnam that 02:34:35 are stimates of the value function for the for the annual literature and the the for the annual literature that suggest that the the port of the top 5 percent gets a lower fraction than does 02:34:54 between 77-point something and my 53.3 percent. Okay? So in that sense, I think he's not my criticism here is that he could have used the 02:35:15 reason, picked a subset, and the better thing would which case, you come to a smaller, smaller fraction. 02:35:30 are not supposed to give long answers, but my 02:35:49 lawyer is a nice guy. MR. COOPER: We're in a special situation. 22 minlike the portfolios studies that Professor Cockburn in that they - they're and Dr. Leonard gets this quite which is - and then there are alternative paths through 02:37:20 this portfolio in that they - they're unlikely to be those kind of portfolios, right? And the difference here is that you could imagine that there are alternative paths through 02:37:16 216 This portfolio that are substitutes for one another. 02:37:20 So, for example, suppose to make this simple, suppose to make this simple, suppose to make this simple, suppose of the mach there are five paths, so you only need 100 patents to implement the 02:37:34 technology. You just need one of them. Then, in fact, one you don't take one one-hundredths to value this; you take one one-hundredth to value this; you take one one-hundredth to value this; and the mean value is higher, as well, because it the mean of 100. It's the portfolio divided by 00:37:52 limited the portfolio divided by 00:37:52 limited paths, and the mean of 100. It's the portfolio divided by 00:38:05 of the complements. There's no evidence in this matter. I mean, people talk loosely about	19	upper bound approach is a reasonable version of	19	designed to advance a particular technology, they
directions here. One is as indicated in my report. Professor Cockburn uses three studies, picks one that seemed to be out of the norm for the academic studies in this area, and I provide open the academic studies in the area, in the academic studies in the area, in the academic studies in the	20	group and value? 02:34:10	20	have a particular technology, then it is a bit 02:36:58
report. Professor Cockburn uses three studies, picks one that seemed to be out of the norm for the academic studies in this area, and I provide 02:34:31 some evidence from a paper by John Putnam that 02:34:35 some evidence from a paper by John Putnam that 02:34:35 surveys the license renewal literature and the surveys the license renewal literature	21	A There are things that go different	21	unlike the portfolio studies that Professor Cockburn
24 picks one that seemed to be out of the norm for the academic studies in this area, and I provide 02:34:31 214 214 215 216 216 217 218 219 219 219 219 219 219 219	22	directions here. One is as indicated in my	22	and Dr. Leonard appeal to in that they they're
the academic studies in this area, and I provide 02:34:31 214 215 imagine that there are alternative paths through 02:37:16 216 216 some evidence from a paper by John Putnam that 02:34:35 2 surveys the license renewal literature and the estimates of the value function for the for 2 surveys the license renewal literature that suggest that 4 the for the annual literature that suggest that 5 the top 5 percent gets a lower fraction than does 02:34:54 5 paths, so you only need 100 patents to implement the 02:37:34 technology. You just need one of them. Then, in fact, one you don't take one five-hundredths to value this; you take one one-hundredths to value this; you take one one-hundredth to value this; you take one one-hundredth to value this; and the mean of 100. It's the portfolio divided by 02:37:52 100; not the portfolio divided by 500. The fraction. 02:35:30 15 16 216 226 236:49 216 226 22 MR. COOPER: We're in a special situation. 218 24 18 mthis and here are alternative paths through 02:37:16 216 216 216 216 216 216 216 216 216 2	23	report. Professor Cockburn uses three studies,	23	unlikely to be those kind of portfolios, right?
214 some evidence from a paper by John Putnam that 20:34:35 1 this portfolio that are substitutes for one another. 02:37:20 2 So, for example, suppose to make this simple, suppose there are 500 patents in the Java ME 4 the for the annual literature that suggest that 4 portfolio, each of which is and there are five 5 the top 5 percent gets a lower fraction than does 02:34:54 5 paths, so you only need 100 patents to implement the 02:37:34 6 Professor Cockburn. So this is the difference 6 technology. You just need one of them. Then, in 6 technology. You just need one of them. Then, in 7 fact, one you don't take one five-hundredths to value this; you take one one-hundredth to value 9 this, and the mean value is higher, as well, because if's the mean of 100. It's the portfolio divided by 02:37:52 10 universe of studies in this area, and for whatever 11 top; not the portfolio divided by 500. 2 So there is this problem with the group 3 and value approach that I have, and I allude to it in several different places about this portfolio likely being composed of substitutes and 02:38:05 02:38:05 02:38:05 02:38:05 02:38:05 02:38:22 02:38:05 02:38:05 02:38:22 02:38:05 02:38:22 02:38:05 03:38:22 03:38:22 03:38:22 03:38:22 03:38:22 03:38:24 03:38:38:38:38:38:38:38:38:38:38:38:38:38	24	picks one that seemed to be out of the norm for	24	And the difference here is that you could
some evidence from a paper by John Putnam that 02:34:35 surveys the license renewal literature and the estimates of the value function for the for surveys the license renewal literature and the estimates of the value function for the for the annual literature that suggest that the for the annual literature that suggest that the top 5 percent gets a lower fraction than does 02:34:54 Professor Cockburn. So this is the difference tokay? So in that sense, I think he's not my so in that sense, I think he's not my so in that sense, I think he's not my so in that sense, I think he's not my so in the sense, in the sense in the suppose to make this simple, so you of patents in the Java ME portfolio, each of which is and there are five technology. You just need one of them. Then, in fact, one you don't take one five-hundredths to value this; you take one one-hundredth to value this, and the mean value is higher, as well, because it's the mean of 100. It's the portfolio divided by 02:37:52 universe of studies in this area, and for whatever 11 100; not the portfolio divided by 500. To the portfolio divided by 500. So there is this problem with the group and vehicle and probably the group and vehicle as a bit of a problem in all of this, and here I think Dr. Leonard gets this quite which case, you come to a smaller, smaller this, and here I think Dr. Leonard gets this quite which case, you come to a problem in all of this, and here I think Dr. Leonard gets this quite which is a long answer. Witnesses are not supposed to give long answers, but my 02:35:49 let me back up. This is a long answer, but my 02:35:49 let me back up. This is a long answer, witnesses are not supposed to give long answers, but my 02:35:49 let me back up. This is a long answer, witnes	25	the academic studies in this area, and I provide 02:34:31	25	imagine that there are alternative paths through 02:37:16
2 surveys the license renewal literature and the 3 estimates of the value function for the for 4 the for the annual literature that suggest that 5 the top 5 percent gets a lower fraction than does 6		214		216
2 surveys the license renewal literature and the 3 estimates of the value function for the for 4 the for the annual literature that suggest that 5 the top 5 percent gets a lower fraction than does 6 Professor Cockburn. So this is the difference 7 between 77-point something and my 53.3 percent. 8 Okay? 9 So in that sense, I think he's not my 10 criticism here is that he could have used the 11 criticism here is that he could have used the 12 oriticism here is that he could have used the 13 other erason, picked a subset, and the better thing would 14 which case, you come to a smaller, smaller 15 fraction. 16 But there is a bit of a problem in all of 17 this, and here I think Dr. Leonard gets this quite 18 wrong, and we have these synthetic portfolios 19 let me back up. This is a long answer. Witnesses 20 MR. COOPER: We're in a special situation. 21 Im thinking about portfolio. You can think about a 22 So, for example, suppose to make this simple, 3 suppose there are 500 patents in the Java ME 4 portfolio, each of which is and there are five 5 paths, so you only need 100 patents to implement the 02:37:34 6 portfolio, each of which is and there are five 9 paths, so you only need 100 patents to implement the 02:37:34 6 paths, so you only need 100 patents to implement the 02:37:34 7 fact, one you don't take one five-hundredths to value technology. You just need one of them. Then, in 7 fact, one you don't take one five-hundredths to value this; you take one one-hundredth to value 9 value this; you take one one-hundredth to value 9 this, and the mean value is higher, as well, because 100; it's the mean of 100. It's the portfolio divided by 02:37:52 11 100; not the portfolio divided by 500. 12 So there is this problem with the group 13 and value approach that I have, and I allude to it 14 in several different places about this portfolio 15 likely being composed of substitutes and 02:38:05 16 But there is a bit of a problem in all of 16 complements. There's no evidence in this matter. I 17 mean,	1	same avidence from a pener by John Butnern that 02:24:25	1	this partfalia that are substitutes for one another 02:27:20
sestimates of the value function for the for the for the annual literature that suggest that the for the annual literature that suggest that the for the annual literature that suggest that the top 5 percent gets a lower fraction than does Professor Cockburn. So this is the difference between 77-point something and my 53.3 percent. Cokay? So in that sense, I think he's not my criticism here is that he could have used the criticism here is the portfolio divided by criticism here is this profilem with the group and value approach that I have, and I allude to it in several different places about this portfolio fraction. Cocasional tritical here is a bit of a problem in all of this, and here I think Dr. Leonard gets this quite wrong, and we have these synthetic portfolios let me back up. This is a long answer. Witnesses wrong, and we have these synthetic portfolios let me back up. This is a long answer. Witnesses are not supposed to give long answers, but m				-
the for the annual literature that suggest that the top 5 percent gets a lower fraction than does Drofessor Cockburn. So this is the difference between 77-point something and my 53.3 percent. Nokay? So in that sense, I think he's not my criticism here is that he could have used the criticism here is that he could have used the universe of studies in this area, and for whatever reason, picked a subset, and the better thing would be to use the universal studies in the area, in which case, you come to a smaller, smaller But there is a bit of a problem in all of this, and here I think Dr. Leonard gets this quite wrong, and we have these synthetic portfolios let me back up. This is a long answers, but my MR. COOPER: We're in a special situation. The WITNESS: Let me be clear about how Tm thinking about portfolio. You can think about a 4 portfolio, each of which is and there are five 5 paths, so you only need 100 patents to implement the 02:37:34 technology. You just need one of them. Then, in fact, one you don't take one five-hundredths to value this; you take one one-hundredth to value this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and the mean value is higher, as well, because this, and let mean value is higher, as well, because this, and let mean value is higher, as well, because this, and let mean value is higher, as well, because this, and let mean value is higher, as well, because this, and let mean value is higher, as well, because this, and let mean value is higher, as well, because this, and let mean value is hi		•		
the top 5 percent gets a lower fraction than does Professor Cockburn. So this is the difference between 77-point something and my 53.3 percent. Nokay? So in that sense, I think he's not — my criticism here is that he could have used the universe of studies in this area, and for whatever traces on, picked a subset, and the better thing would be to use the universal studies in the area, in which case, you come to a smaller, smaller fraction. But there is a bit of a problem in all of this, and here I think Dr. Leonard gets this quite wrong, and we have these synthetic portfolios — let me back up. This is a long answer. Witnesses are not supposed to give long answers, but my MR. COOPER: We're in a special situation. THE WITNESS: Let me be clear about how Tm thinking about portfolio. You can think about a 12. 32.34:54 5 paths, so you only need 100 patents to implement the 02:37:34 technology. You just need one of them. Then, in fact, one — you don't take one five-hundredths to value this; you take one one-hundredths to value this, and the mean value is higher, as well, because it it's the mean of 100. It's the portfolio divided by 02:37:52 100; not the portfolio divided by 500. So there is this problem with the group and value approach that I have, and I allude to it in several different places about this portfolio 15. likely being composed of substitutes and 02:38:05 16. But there is a bit of a problem in all of this, and here I think Dr. Leonard gets this quite 17. mean, people talk loosely about their substitutes 18. here, but I've seen nothing in the record that 19. let me back up. This is a long answer. Witnesses 19. alwyer is a nice guy. MR. COOPER: We're in a special situation. 20. anybody else, to tease out that, but it is a 21. 22. 238:05 22. 238:05 239 240 250 261 270 280 280 280 280 280 290 291 291 291 292 293 293 294 294 294 295 2				
Professor Cockburn. So this is the difference between 77-point something and my 53.3 percent. Nokay? So in that sense, I think he's not my Criticism here is that he could have used the Criticism here is that he could have used to give long answer. Criticism here is that he could have used the Criticism here is that he could have used to give long answers, but my Criticism here is this, and the mean value is higher, as well, because Criticism here is this, and the mean value is higher, as well, because Criticism here is that he could have used the oriticism here are unlikely to have been 500 independent Criticism here is that he could have used the Criticism here is that he could have used to give long answers, but my Criticism here is that he could have used to give long answers, but my Cr				-
between 77-point something and my 53.3 percent. Nokay? So in that sense, I think he's not my criticism here is that he could have used the 02:35:15 universe of studies in this area, and for whatever reason, picked a subset, and the better thing would the to use the universal studies in the area, in which case, you come to a smaller, smaller But there is a bit of a problem in all of this, and here I think Dr. Leonard gets this quite wrong, and we have these synthetic portfolios let me back up. This is a long answer. Witnesses are not supposed to give long answers, but my 02:35:49 MR. COOPER: We're in a special situation. The WITNESS: Let me be clear about how Tim thinking about portfolio. You can think about a Tim thinking about portfolio. You can think about a Tim thinking about portfolio. You can think about a Tim thinking about portfolio is his have used the value this; you take one one-hundredth to value this, and the mean value is higher, as well, because this; you take one one-hundredth to value this; you take one one-hundredth to value this; and the mean value is higher, as well, because this, and the mean of 100. It's the portfolio divided by 500. So there is this problem with the group and value approach that I have, and I allude to it in several different places about this portfolio 10; not the portfolio divided by 500. So there is this problem with the group and value approach that I have, and I allude to it in several different places about this portfolio fraction. 20; 35:30 15 likely being composed of substitutes and 02:38:05 complements. There's no evidence in this matter. I mean, people talk loosely about their substitutes here, but I've seen nothing in the record that allows me or Professor Cockburn or Dr. Leonard, or anybody else, to tease out that, but it is a 02:38:22 potential problem, because it treats these 500 applements as if they were 500 independent patents, and there are unlikely to have been 500 independent patents. And to the degree the				
8 Okay? 9 So in that sense, I think he's not my 9 this, and the mean value is higher, as well, because 10 criticism here is that he could have used the 02:35:15 11 universe of studies in this area, and for whatever 12 reason, picked a subset, and the better thing would 13 be to use the universal studies in the area, in 14 which case, you come to a smaller, smaller 15 fraction. 02:35:30 16 But there is a bit of a problem in all of 17 this, and here I think Dr. Leonard gets this quite 18 wrong, and we have these synthetic portfolios 19 let me back up. This is a long answer. Witnesses 20 are not supposed to give long answers, but my 21 alwyer is a nice guy. 22 MR. COOPER: We're in a special situation. 23 THE WITNESS: Let me be clear about how 24 I'm thinking about portfolio. You can think about a 8 value this; you take one one-hundredth to value 9 this, and the mean value is higher, as well, because 10 it's the mean of 100. It's the portfolio divided by 500. 21 livis the mean of 100. It's the portfolio divided by 500. 22 by this, and the mean value is higher, as well, because 10 it's the mean of 100. It's the portfolio divided by 500. 22 by this, and the mean value is higher, as well, because 11 lo0; not the portfolio divided by 500. 22 by this, and the mean value is higher, as well, because 12 betail, sand the mean value is higher, as well, because 13 this, and the mean value is higher, as well, because 14 in several different places about this portfolio oivided by 500. 22 by this, and the mean value is higher, as well, because 23 because it treats the overall portfolio divided by 500. 24 betail profile in this mater. 25 patents as if they were 500 independent patents, and there are unlikely to have been 500 independent 24 patents. And to the degree there are substitutes in				
So in that sense, I think he's not my criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is that he could have used the criticism here is this problem with the group and value approach that I have, and I allude to it in several different places about this portfolio be to use the universal studies in the area, in 14 in several different places about this portfolio 15 likely being composed of substitutes and 02:38:05 16 But there is a bit of a problem in all of 16 complements. There's no evidence in this matter. I 17 mean, people talk loosely about their substitutes 18 here, but I've seen nothing in the record that 19 let me back up. This is a long answer. Witnesses 19 allows me or Professor Cockburn or Dr. Leonard, or 20 are not supposed to give long answers, but my 21 potential problem, because it treats these 500 22 MR. COOPER: We're in a special situation. 23 THE WITNESS: Let me be clear about how 24 patents. And to the degree there are substitutes in				
criticism here is that he could have used the 02:35:15				-
universe of studies in this area, and for whatever reason, picked a subset, and the better thing would be to use the universal studies in the area, in which case, you come to a smaller, smaller fraction. 02:35:30 But there is a bit of a problem in all of this, and here I think Dr. Leonard gets this quite wrong, and we have these synthetic portfolios let me back up. This is a long answers, but my 02:35:49 MR. COOPER: We're in a special situation. The WITNESS: Let me be clear about how I and value approach that I have, and I allude to it in several different places about this portfolio likely being composed of substitutes and 02:38:05 15 likely being composed of substitutes and 02:38:05 16 complements. There's no evidence in this matter. I 17 mean, people talk loosely about their substitutes 18 here, but I've seen nothing in the record that 19 allows me or Professor Cockburn or Dr. Leonard, or anybody else, to tease out that, but it is a 02:38:22 20 anybody else, to tease out that, but it is a 02:38:22 21 potential problem, because it treats these 500 22 patents as if they were 500 independent patents, and THE WITNESS: Let me be clear about how 23 there are unlikely to have been 500 independent 14 in several different places about this I have, and I allude to it 15 in several different places about this portfolio 16 complements. There's no evidence in this matter. I 17 mean, people talk loosely about their substitutes 18 here, but I've seen nothing in the record that 20 anybody else, to tease out that, but it is a 02:38:22 21 potential problem, because it treats these 500 22 patents as if they were 500 independent there are unlikely to have been 500 independent 23 patents.
